Subject: Submission of Internship Report.

Dear Sir:

With due regard, I am illuminating you that I have finished my Internship report on "Marketing Practices of Twinkle Baby Diaper of ACI Limited" in the wake of finishing 90 days temporary job at ACI Ltd. In this report, I have attempted to consolidate the experience, perception and getting the hang of during the temporary job time frame to set up the report. Every one of the guidelines and recommendations given by you are followed in my report which I found entirely profitable while doing the report. I have attempted my best to make this report as extensive and enlightening as could be expected under the circumstances and accept this report will give students complete and clear picture of advertising and special systems of ACI Ltd.

I will be profoundly committed in the event that you acknowledge this report being caring enough to acquit the undesirable blunders and missteps of the report.

Sincerely yours
Md. Yashir Salman

Acknowledgement

Most importantly, I'd offer my thanks to Allah the Almighty, who helped me with His quality, gave me shrewdness and tolerance to finish this report. This report would not be practiced without the liberal commitments of numerous people. I am particularly appreciative to them for their boundless assistance and backing.

ACI Limited gave me huge help and direction for my report to be finished effectively. I might want to thank my Internship Instructor Md. Kaium Hossain, Assistant Professor, Department of Marketing, University International University. The ethical rules, unending exertion, and consolation by him helped me a great deal recorded as a hard copy this report.

I additionally might want to thank my temporary job boss Md. Sharifuzzaman for his caring supervision and backing all through my temporary job period. Once more, I might want to offer my principal thanks to different authorities of ACI Limited who helped me and gave me their profitable time, furnishing me with the most applicable data based on which I have arranged this report.

At long last, I might want to give a unique gratitude to Mr. Khandakar Ishtiak Ahmed, Md. Mahfuzur Rahman Rashed, Mr. Sharifuzzaman and Ms. Tabinda Shamarukh, Mrs. Sadia Sameera, Mr. AseerAwsaf for their numbskull support while gathering information required for my report. I might likewise want to thank to my folks, individual understudies for their helps, support during the temporary job time frame.I might want to say in all seriousness.
Executive Summery

The report is based on market practices of Twinkle Baby Diaper of ACI Limited. The purpose of this report is to identify the ways ACI Limited used to market their new product baby diaper and used in doing their business. As Twinkle Baby Diaper is launched in 2017 still now, it cannot cover the whole country. In a barrier free-market environment, alluring customers is highly challenging. It prompts to build a competitive marketing and promotional strategy. The strategy must be aligned with time, demand for the product, and conditions of the competitors.

Before launching Twinkle Baby Diaper, ACI Limited has used several types of marketing strategies such as segmentation, targeting, differentiation, and positioning. In taking these strategies, it has different analysis aspects like PESTEL analysis, SWOT analysis of the product, etc. This report also provides a promotional mix used by ACI Limited. The report finds out the impacts of marketing tools on the brand equity of Twinkle Baby Diaper. Different promotional strategies are taken to increase the revenue of a company. Without adopting proper tools, it’s not possible to enhance the presence of the product into the customers’ mind. The more inculcation the brand could be, the more successful the promotional strategy is considered. ACI Limited back to one year made the inclusion of Twinkle Baby Diaper into its Hygiene Product Division. After launching, the brand has witnessed several promotional techniques to keep its presence in the market. The promotional strategy is detailed in the report.

Marketing strategies tries to provide the products that the customers’ needs. Promotion builds relationship between a marketer and the publics. The success of the strategy depends on the strength of the communication channel. The stronger the channel is, the more successful the strategy is deemed. Proper selection of marketing strategy and promotional mix brings success into the strategy.

CHAPTER-03
ANALYSIS AND FINDINGS
3.0 Analysis

3.1 Diaper:
A diaper is one kind of wearable thing by which the wearer can pee on it without any problem, this diaper can absorb the wastage and the wearer cannot feel any hesitation.

Diapers are made from special fabric which can absorb the wastage. Material diapers are made out of layers of texture, for example, cotton, hemp, bamboo, microfiber, or even plastic filaments, for example, PLA or PU, and can be washed and reused on various occasions.

Diapers are principally worn by newborn children, little children who are not yet potty prepared, and by kids who experience bedwetting. They are additionally utilized by grown-ups with incontinence, in specific conditions where access to a can is inaccessible or for mental reasons. These can incorporate those of cutting-edge age, patients' bed-bound in an emergency clinic, people with particular kinds of physical or mental handicap, diaper fetishists, and individuals working in outrageous conditions, for example, space travelers.

The main competitors of Diaper in the market are:

3.2 Diaper Industry in Bangladesh:

As we know that baby skin is soft so the companies always tries to produce comfortable products for the babies. Parents are always much tensed for their babies and that’s why they always want to buy the best products for their babies. Now at present baby diaper industry have emerged as a new business opportunity for the organizations so various companies come forward to produce the diapers.

According to news the baby diaper industry is about 400 crore and day by day it increases. This industry is emerging day by day and last year it increased about 50%. From a news source we come to know that the local companies produce 30% diapers and the rest is provided by the international brands. So this is the current situation of diaper industry of Bangladesh.
At now four companies such as Supermom, Twinkle Baby Diaper of ACI Limited, Bashundhara of and Chu-Chu of are producing baby diapers. The baby diaper is now very competitive because of this brand.

Day by day the economic condition is increasing so the buying power of the humans is increasing day by day. The birth rate is increasing the globalization effect and the rapid growth of industry is also the main factor of people economic power so that they can buy more products from before. Now-a-days the working numbers of the woman’s is increasing day by day so that they have to work outside and cannot take care of their babies then before so they prefer baby diaper and they want the best. Besides, purchasing power of our citizens has increased. Now people have more money in their pockets. That prompts them to seek for comfort. It turns into using baby diapers for their infants. Other factors also play crucial role forcing parents to be used to with baby diapers. People have nowadays become highly urban centric. Urban settlement has increased dramatically in recent years. Rapid urbanization could be seen a factor for spurring growth of diapers in Bangladesh. Besides, strong vigilance of UNICEF, WHO, BRAC, and other Organizations have made improvement in birth rate. The more birth rates the country will see; the more growth will happen for the diaper industry.

3.3 Diaper Industry in the World:
The worldwide infant diapers market was esteemed at $48,121.00 million of every 2017, and is anticipated to reach $78,420.00 million by 2025, enlisting a compound yearly development rate (CAGR) of 6.3% from 2018 to 2025. In 2017, the U.S. created the most astounding income, representing more than one-fifth offer in the worldwide market. Various sorts of diapers produced far and wide incorporate material diapers, dispensable diapers, preparing nappy, swim pants, and biodegradable diapers. Fabric diapers are additionally sectioned into level material diapers, fitted material diapers, pre-overlap fabric diapers, across the board material diapers, and others. Consistent ascent in discretionary cashflow and different activities taken by the producers to expand mindfulness among guardians for child cleanliness in the rising economies has
powered the development of the worldwide infant diapers Industry. In addition, diaper banks have a critical impact in making wellbeing mindfulness among the purchasers.

3.4 Market Segmentation:
Market division is the real procedure of recognizing sections of the market and the way toward partitioning a wide client base into sub-gatherings of buyers comprising of existing and planned clients. Market division is a shopper arranged procedure and can be connected to practically any sort of market. In separating or fragmenting markets, analysis normally search for shared attributes, for example, regular needs basic premiums, comparable ways of life or even comparative statistic profiles. Thus, advertise division accept that various fragment requires distinctive showcasing programs, as assorted clients are generally focused through various offers, costs advancements, conveyances or a mix of promoting factors. The traditional variables that may be used for market segmentation can be grouped into four main categories:

- **Demographic** (Age, gender, income, occupation, family size, religion and nationality)
- **Geographic** (Climate, terrain, natural resources and population density)
- **Psychographic** (Personality traits, social class, values, motives, interests and lifestyles)
- **Behavioral** (Occasion, benefits, user status, usage rate, loyalty status)

ACI Limited uses statistic criteria to section the market which incorporates age, sexual orientation, pay, occupation, family size, religion and nationality factors by defending quantifiability, significance, openness, noteworthiness. As Twinkle Baby Diaper is a child item, ACI uses age criteria and furthermore salary criteria by giving different kinds of SKU (Stock Keeping Units).

ACI Limited used these criteria’s when evaluating the market segments:

- Segment size and growth
- Competitive position
- Cost of reaching the segment
- Compatibility with the organization’s objectives and resources
3.5 Market Targeting:

When the market segmentation has been accomplished, ACI Limited was conscious about the needs and wants of its goals. For the benefit of the company an organization should realize its customers and also know about their competitors. It is vital to know that which segment is more profitable. There are three market coverage alternatives which can be applied:

- **Undifferentiated marketing**
- **Differentiated marketing**
- **Concentrated marketing**

ACI Limited uses concentrated advertising as it just spotlights on infant diaper instead of infant and grown-up diaper. As Hygiene Products Department is new division of ACI Limited, it wouldn't like to go out on a limb of covering the entire market portions as a result of the commanding intensity of remote diaper organizations. The organizations with restricted assets will ordinarily target only one or a couple submarkets. In the event that a portion is effectively picked, there is a probability that the firm may procure a high pace of profit for its venture. Be that as it may, this type of showcasing could likewise include a high-chance factor. On the off chance that the chose portion fizzles, the organization can encounter robust misfortunes. In whole, ACI Limited chose the proper market inclusion procedure was dictated by various variables:

- The kind of administration which is to be offered: among grown-up and child diaper, ACI Limited needs to serve just infant diaper showcase.
- Diversities inside the market: ACI Limited needs to comprehend their clients' prerequisites first, at that point it will choose to serve different sections of the diaper showcase.
- Competitors advertise inclusion methodologies: If the contending diaper organizations are effectively applying division procedures; likely, it would not bode well to utilize an undifferentiated showcasing technique for ACI Limited.

Which portion ought to be chosen? Organizations should just consider those market portions that are gainful. In this manner, they should target beneficial clients inside those fragments and sustain a dependable association with them, so ACI Limited select concentrated promoting.
3.6 Differentiation and Positioning:

Differentiation and Positioning are depending on each other. Situating, which is the way toward masterminding an item to involve a reasonable, particular and attractive spot in respect to contending items in the brains of objective clients, relies upon the separation. ACI Limited uses SWOT and PESTEL examination to separate itself from the contenders.

Right off the bat, ACI Limited required an arrangement on what position they needed to accomplish with their item Twinkle Baby Diaper in the brains of the objective clients. The position is the principal thing a client would consider hearing the name of the item or the brand. This position ought to be picked so it is recognized from contending items to the best degree conceivable and lead to the best bit of leeway in the objective market. ACI Limited separated the Twinkle Baby Diaper by giving preferred highlights over different organizations items, for example, Super Mom of Square Toiletries, Chu-Chu of Bangladesh Silicon Corporation, Bashundhara Baby diaper of Bashundhara Group, and Neo Care of Incepta Pharmaceuticals. Exceptional highlights of Twinkle Baby Diaper include:

- Wetness pointer.
- Elastic midsection band.
- Side tape.
- Velcro belt.
- Comfortable embellished plan.
- Anatomic Shape.

Twinkle Baby Diaper is as delicate and delicate as a mother's touch and as careful and watchful as a mother's impulses. It soothes mother's pressure by guaranteeing zero spillage and its wetness pointer will reveal to her when diaper should be changed. A mother does the best employment in sustaining her sparkling little star. ACI loans hands to be there for moms.
3.7 Marketing mix (4Ps) of Twinkle

<table>
<thead>
<tr>
<th>Brand Name</th>
<th>Product Type</th>
<th>Product Size</th>
</tr>
</thead>
</table>

3.7.1 Product
The main purpose of Twinkle diaper is to provide the best quality diaper to its valuable consumers. Sophisticated machineries and manufacturing plant are used to make twinkle diaper and to meet the customer needs. The twinkle baby diaper has variations as per customer needs.
3.7.2 Price
The pricing of twinkle baby diaper is very reasonable so that the all classes of people can easily buy it. For setting up the twinkle use two types of policies. They are:

<table>
<thead>
<tr>
<th>Twinkle Baby Diaper</th>
<th>Pricing Strategies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Small 3 to 7 Kg</td>
<td>Competitor price</td>
</tr>
<tr>
<td>Medium 5 to 9 Kg</td>
<td>Market Price</td>
</tr>
<tr>
<td>Large 8 to 15 Kg</td>
<td></td>
</tr>
<tr>
<td>Extra Large 15+ Kg</td>
<td></td>
</tr>
</tbody>
</table>
Competitive price: Because of high competition in the market twinkle baby diapers price is near to competitors’ price. If this is not happens then it might lose market share.

Market oriented price: Twinkle baby diaper considers market-oriented price using a single price in around the country.

<table>
<thead>
<tr>
<th>Brand</th>
<th>SKU</th>
<th>Maximum Retail Price</th>
<th>Wholesale Price</th>
</tr>
</thead>
<tbody>

3.7.3 Place

ACI Ltd has one of the most efficient and effective distribution channels in all around the country. The reason behind making Strong distributions channels is to develop to reach to the customers very easily and for the convenience of the distributors so that they can distribute products easily of every district in Bangladesh. Twinkles effective distribution channel makes them reliable and unbeatable than other diaper producers. ACI also has strong supply chain team and logistics team to operate every operation easily.
Twinkle trusts that only delivering the certain product to client hands isn't enough to satisfy or bring loyalty to the customers for bringing loyalty they have to promote more too various places. For making potential customers into actual customers they have to develop their distributor channel. There are warehouses from where twinkle is distributed in whole country. For Dhaka, the warehouse is in Gulshan. When any client want product then the twinkle management team distribute their product throughout these warehouses. Here, the administrative firms divide organization into few units who are keen about the business partner of ACI ltd. ACI has divided the whole Bangladeshi market into regions and areas for its business deal purpose.

<table>
<thead>
<tr>
<th>Twinkle</th>
</tr>
</thead>
<tbody>
<tr>
<td>D2D Activation (Dhaka)</td>
</tr>
<tr>
<td>D2D Activation (Outside Dhaka)</td>
</tr>
<tr>
<td>Amusement Park Activation (Eid)</td>
</tr>
<tr>
<td>Hospital Activation (2nd Phase)</td>
</tr>
<tr>
<td>Market Activation</td>
</tr>

<tr>
<td>Transport Hub Activation (Eid-UI-Fitr)</td>
</tr>
<tr>
<td>Highway Restaurant Activation (Eid-UI-Fitr)</td>
</tr>
<tr>
<td>Staff Sales</td>
</tr>
</tbody>
</table>

From this table we came to know about that in which places twinkle promote and sale their products. At first, they do D2D activities in both Dhaka and outside Dhaka. Then activation dome in amusement park. Hospital activities also occurred. Activation done in Dhaka International Trade Fair and Also Chittagong International Trade Fair. Besides this there were also transportation activities and staff sales happened to promote the twinkle brand in various places.
3.7.4 Promotional Activities:

For the success of an organization they need to undertake effective promotional activities. Only effective strategies for the promotion make a brand successful. The promotional activities of various brands are different because of the customer demand. The uniqueness of promotions makes a brand loyal to the customers and they will buy the products on and on. The tactics are undertaken to retain the customers. ACI Limited is using plenty promotional activities for making the customers, retailers, distributors wary and to purchase Twinkle Baby Diaper.

3.7.5 Push and Pull Strategies:

Push and pull strategies are different for the promotional activities. These two strategies must be unique and tactical. For sustainability the differentiation must be realized carefully.

3.7.6 Push Strategy:

Twinkle Baby Diaper is a new product line in the industry. It has only 2% market share in the highly competitive industry. There is no bottleneck in the industry, the companies are facing competition within. Various marketing blueprint are made to push the products to the retailers. Push strategy demand is made to downstream of the supply chain process. ACI Limited is the manufacturer. The company creates demand by producing quality product. After the invention of the product, the company has launched various innovating marketing blueprint. The schemes are Quality Purchase Scheme (QPS), Quantity Purchase Display Scheme (QPDS), and Winter Dhamaka.

3.7.7 Pull strategy:

Besides pull strategy the company invests huge money on advertisement and other pull strategy. Advertisements are broadcast on TV and print media. The traits of the products are then instilled into customers mind. The commercials are useful for customers to enrich the knowledge about the products. ACI spend less money in commercial in TVC.

3.7.8 Promotional Mix:
Advertising:

Advertising became is highly popular in this century. The progress in printing and packaging, industrial growth led popularity of advertising. Recent times without advertising promoting product aren’t possible. Advertising is vital element. This promotional mix is paid by sponsors. The sponsors bear expense for this product. This is costly. Print media is less expensive. Advertising in television media is much costly compared to others. When a product is in growth phase, then advertisements doesn’t create much impact on revenue. Twinkle Baby Diaper is in the early growing stage. Twinkle Baby Diaper uses several media to advertise their product that contains (TVC), Outdoor advertising, print media.

Under this tool the activities Twinkle Baby Diaper undertakes are:

- Television Commercial (TVC) TVC are shown in televisions and billboards and other media.
Personal Selling:
Personal selling is to sell product meeting face to face with the customers. The sales force meets with the potential customer base and focus to sell their products to the customers. It makes two-way communication between the seller and the buyer. As under the tool sales people have the chance to interact with the customers, they get flexibility to adapt the messages according to the customers reaction. It creates relationship with the customers. But this tool of promotional mix is very costly (Meunier-Fitzhugh & Piercy, 2007). Product activation in hospitals and door to door selling is a kind of personal selling used by Twinkle Baby Diaper. It creates brand promotion directly to the toddler’s mothers and also creates brand awareness among them. Ultimately mothers are the influencers in purchasing diapers.

Direct Marketing:
Direct marketing is of marketing mix where companies directly communicate to customers via a different of media including phone, messaging, email, websites, online adverts, promotional letters and targeted television, newspaper and magazine advertisement, it is also known as direct response. After the activation programs some employee of ACI Limited used to call the customers those they actually sell product during the activation to take feedback about the product.
Sales Promotions:
Sales promotion is promotional mix that make demand among the customers but sales promotion provides incentives to channel for buying products. Via advertising, customers intend to buy products. Sales promotion tool is used to attain multiple objectives. It is useful to attract new customers, to make loyal customers. By giving incentives marketers keep the customers with them. Sales promotion allow manufacturers to experiment with varying prices. Samples, Rebates, Coupons, Price Packs, Point of Purchase (PoP), Cross Promotions are taken for making sales promotion.

A) **Consumer Promotions**: The consumer promotions used by the ACI Limited are given below:

- **Samples**: Give samples in hospital activation
- **Point of Purchase (PoP)**: Products are displayed to seek attention.
• **Gifts**: In stay in competition free gifts are provided with purchase of twinkle products.

B) **Trade Promotions**: The trade promotions used by the ACI Limited are given below:

- Allowances: Proper allowance is given with every particular programmed.

Impact of Winter Dhamaka:

ACI authority of Twinkle Baby Diaper set a target of 110 million taka for the three months (November-January). It has achieved 110.3 million Taka in these three months. It has achieved .30 million Taka more than its targeted amount.
Public Relations
Public relations (PR) are the practice to manage spreading the information between an individual organization. This differentiation of marketing communications. Public relations are created to cover the clients for free rather than marketing or advertising.
ACI Limited sometimes make article too attract the customers.

The target of public relations is to maintain the public, investors, partners, employees, and other stakeholders and ultimately persuade them to maintain a positive or favorable view.

Public relation is actually for convincing the people. The PR officers actually talk with customers and tell them about the products and take feedback about the product. If any improvement is needed then they take note about that and give it to the twinkle team.

3.8 Findings
Subsequent to examining my perceptions during my entry level position period, I have a few discoveries.

These discoveries are totally from my own perspective. Those are given below:

3.8.1 Less Number of Employees: Although Consumer brand is a huge company but the hygiene products department is started its journey from 2017 and there is a smaller number of employees (11 employees in the head office and approximately 250 employees in the sales force) to conduct their business and making the product available in national wide.

3.8.2 Vulnerable Distributors: During the internship period I have seen that the sales people are continuously changing the distributors. So, the smooth flow of supply of product isn’t possible and it also increase the cost of the product. Adding new distributors and building loyal and profitable relationship with them are also so much difficult.

3.8.3 Less Media Activities: ACI is one the top rated company of hygiene product but is not viewable to the customers. As the income of the people are increasing and women participation in the work are recently booming, parents need more comfort in taking care of their children. So ACI limited needs to promote their ‘Twinkle Baby Diaper’.

3.8.4 Competitive Market: Diaper market of Bangladesh is so much competitive. 70% of thewhole diaper market is served by the foreign companies and only 30% is served by local companies. As government of Bangladesh is trying to make a comfortable business environment for the foreign companies and reducing import taxes in some sectors which is giving challenges the local companies.
3.8.6 Budget Constraints: As the Hygiene Products Department is launched in 2017, it has budget constraints. Twinkle Baby Diaper has only 2% in the diaper market and the product has not properly accepted by the customers. So, ACI authority don’t want to take risk of investing too much money.
CHAPTER-04
CONCLUSION &
RECOMMENDATIONS
4.1 Conclusion

There are many companies operating in the diaper industry of Bangladesh. The market is highly competitive and it really hard to get response from the market. Consumer product Industry has grown in Bangladesh in the last two decades at a considerable rate. ACI Limited is a well reputed corporate in Bangladesh. But now a days the market is so much competitive. So, consumer brands companies need much greater coordination in taking any promotional activities and understanding customers in introducing any kinds of marketing strategy. By conducting image analysis, ACI Limited can better target and segment customers, select the proper combination of marketing channels, and precisely measure the impact of promotional programs. ACI Limited is a follower in the diaper market so it needs to take many necessary steps to exist in the market.

4.2 Recommendations

Here are some suggestions are given that ACI Limited can use to reduce their weakness to compete with the market rival and improve their market positions. These are:

4.2.1 Ensure Proper Placement: Distribution procedure ought to be smooth and arrangement ought to be guaranteed across the nation. Inside clash inside channel ought to be taken leveled out for level dissemination framework. Powerless dissemination issue ought to be settled through keeping up great business association with the wholesalers by giving impetuses to them.

4.2.2 Increasing Media Activities: Diaper market is so much focused and is commanded by the remote brands. Along these lines, the best way to contend with those brands and rule the market is making the clients, retailers, merchants mindful about the indigenous brands through forceful limited time and media exercises.
4.2.3 Recruiting Employees: As the Hygiene Products Department has less quantities of representatives, they ought to fortify their business power so they can make the item accessible all through the nation. Enlistment of new workers who are knowledgeable about cleanliness items part may include additional worth.

4.2.4 Keeping the Product Available: ACI Limited must keep their item accessible. They ought to keep up their entire appropriation chain appropriately and keep it smooth to meet the longing of the clients.

4.2.5 Consulting SR Regularly: SR (Sales Representative) is the individual working at the root level and in charge of extreme handling. Next to this, Sales agents are increasingly educated about the root level market. In the event that ACI needs 100% productivity, they should give sufficient preparing and examine increasingly more steadily with them to create advertising techniques and special exercises. Other than this Area Sales Managers/Territory Managers need preparing. Without a decent territory chief, the Sales Representative can't be effective enough as they will get legitimate interview.

4.2.6 Product Display: Window show is one of the strategies that sells quietly, increment store's picture and help to settle on choice. It is so powerful to youth. In this way, item show or window show could be another methodology for ACI to spell.

4.2.7 Government Initiatives: Foreign brands lead the pack in the market. The nearby organizations should converse with the Ministry of Commerce about their worries so the administration find a way to lift up the neighborhood organizations.
