Subject: Submission of Internship report

Dear Mam,

I would like to submit my report titled ‘An Analysis of Retail Banking Products of The City Bank Limited prepared as a part of the requirement for BBA program of United International University.

I have completed my internship program in The City Bank Limited and I worked there as an intern for three months. Working on this report was a great learning experience for me as I got to learn the differences between practical and theoretical work. I hope you will find the report to be systematic and reliable.

I would like to take this opportunity to thank you for all the support and guidelines that you have provided, which I hope to continue getting in the future.

Sincerely yours,
Nahida Akter Mitu

Acknowledgement

First I want to pay my gratitude to almighty Allah for enabling me to prepare the report successfully. Then I would like to express my sincere gratitude and cordial thanks to some specific persons who helped me to organize this report and for their kind opinion, suggestions, instructions and support and appropriate guidelines for this.

First of all, I would like to thank my Internship Supervisor Prof. Dr. Salma Karim for her guidance and assistance in preparing the report on An Analysis of Retail Banking Division of The City Bank Limited. Her valuable advice has helped me a lot in writing this report. I am immensely thankful to her for the supports she has provided during my Internship period.

Next, I would also like to express heartfelt gratitude to my organizational supervisor at The City Bank Limited, Mr Zahid Hasan Mona, Branch Manager, Nawabpur Branch. He directed me towards the right information and regularly reviewed my progress in preparation of this report. He has provided the information about the organization and the information about Branch Banking as well to help me with the report.

Finally, this report would not have been possible without the dedication and contribution of all my colleagues who have helped me by teaching all the works. I express my sincere gratitude to all of them. Their valuable contribution is what made preparing this report.
DECLARATION

I am Nahida Akter Mitu, student of School of Business and Economics (Accounting) of United International University, Bangladesh, do hereby declare that the internship Report on "An Analysis of Retail Banking Products of The City Bank Limited " is an original work and has not been previously submitted for any degree, diploma, title, or recognition.
Executive Summary

Today the purpose of banking and activities have changed a lot by following modern banking system as well as because of customer demands. Bank has extended their business to gain more revenue and reputation. The City Bank Limited (CBL) is executing their plans of launching proper banking service system and business all the branch. They became more concentrated on customer service to make the customers loyal to them as because the loyal customers contribute mostly to gain the future revenue. The mainly focused areas of this report are retail banking products details and customer service of CBL.

The origin, background, objective, methodology and limitations have covered the initial part of the report. Actually it describes the way and background of the study to prepare the report. The second part covers briefly their mission, vision, objective and business strategies.

The next part is about main topic of this report by briefly describing the retail product and services which are offered to customers. Then the reports concludes with the recommendations which will help them to be more customer friendly from the real observation of three months’ work experience at Nawabpur branch of CBL.

Chapter One
1.1 Introduction

Bank is an authorized financial institution which receives money as deposit, make loan, make payment and provides number of financial services to the customers. In every country, all the banks are regulated by the central bank of the county. There are basically two types of Bank based on their basic services: Commercial bank and Investment bank. Commercial banks are those accept deposits through different type financial product as like Savings account, Current account, Fixed deposit receipt and so many; make money by earning interest from loans and provide very basic services. Investment banks which work as financial intermediary that perform so many complex financial transactions and services.

Retail banking basically serves the main purpose of banking. The branches of large commercial banks as well as CBL branches main activities are doing retail banking. CBL is adding new services and products under retail banking to serve the valuable customers in more specific way.

The City Bank Limited is one of the leading private banks of Bangladesh right now. They provide the customer service in both the way through internal banking and internet banking system. The divisions of the bank in the real time online banking are backed by a strong service delivery or operations setup with brilliant IT backbone to serve the customers. Such centralized system made the business to serve their customers more genuinely and effectively. Internal banking is a very basic system of providing service to the customers, where the employees or officers provide direct service to each and very customers. So it’s important to know what kind of services a customer can get and what is available under internal banking system. As there are lots of products and services are available for the valuable customers; so if any candidate wants to work as a direct customer’s service provider, he or she must know about basic internal banking system and services.
1.2 Literature Review

There are number of studies and opinion on bank and banking activities. A study says that the private banks are more customers friendly and more revenue gaining institution than public ones. Chowdhury (2002) in his study portrayed and suggested that commercial banks should emphasize the performance of banks and entail knowledge regarding the relationship between profitability and other factors such as the market size, bank’s risk, and bank size, etc. (Chowdhury, 2002)

The relationship between service quality and its impact on banking providers will be explored in terms of both qualitative and quantitative benefits. Regarding qualitative benefits, customer satisfaction and loyalty were major concerns as Oliver (1993) and Newman et al., (1998) found that quality was an antecedent to satisfaction, and Cronin and Taylor (2006) discovered that perceived service quality brought about satisfaction or vice versa. (Cronin & Taylor, 2006)

Sathye’s study (1999) stated that six major determinant factors for adoption or rejection of an Internet banking service were: the availability of infrastructure; resistance to change; ease of use; reasonable price; awareness of service and its benefits; and security concerns. (Saeidipour, Ranjbar, & Ranjbar, n.d.) The results from the study demonstrated that security concerns and lack of awareness about Internet banking and its benefits played the most important role as the obstacles to non-adoption for Internet banking.

1.3 Objective of the report

From general view the objective of this report is to accomplish the requirement of BBA program. The first objective of this report is to express practical life situations within the structure operating atmosphere. However the target behind this study might one thing be broader. Therefore the focused objectives of the study are specifically:

1. To state the basic concepts and objectives of Retail Banking.
2. To illustrate retail banking products of CBL and their features.
3. To identify the services provided by CBL.
4. To determine the actual and potential target market of CBL.

5. To recognize e-banking (electronic banking) activities under retail banking.

6. To analyze SWOT of CBL.

1.4 Methodology

The topic of the report has been chosen from the suggestions of branch officers and approved by the supervisor who has helped a lot to prepare this report. Both primary and secondary sources of data have been used in this study. The entire process of methodology for making this report is detailed:

Primary Source

Information and data directly were collected from the executives of the bank through interview and also from the regular customers. The assigned practical task also helped to collect the data.

Secondary Source

The CBL’s website, annual reports files, articles, publications as well as others study reports on retail banking of CBL are used as secondary data sources.

Software

References and citations are provided through Mendeley Reference Management software.

1.5 Limitations of the report

This report has fallen short within the following areas:

- Solely 3 months were not enough to learn about all kinds of retail (deposit and loan) merchandise.

- The organization maintains strict confidentiality regarding their monetary and alternative data. They are fearful of any kind of data outpouring to their competitors.

- Some officers were not that much cooperative for giving the information that might facilitate to organize this report.
Chapter Two
2.1 Company Profile

The City Bank Limited (CBL) is the initial and oldest private sector Bank in Bangladesh. It was 1983 when CBL started their journey at BongoBandhu Avenue in Dhaka city. Today CBL is one of the top five commercial banks of Bangladesh. And it is also one of the few banks of Bangladesh with centralize system as well as does not follow traditional geographically managed, branch based business or profit model. 13 prominent visionary businessmen made the bank establish authorized capital of Tk. 1.75 Billion. The City Bank Ltd is serving its clients at home & overseas with 120 branches spread all over the country which contain 99 online branches, one developed Islamic banking branch, one SME facility focus and 11 SME/Agri branches serving across the country & nearby three hundred oversea correspondences casing the complete major towns and business center of the world.

The service area of CBL includes expanded areas of commerce, trade and industry which happened to meet the inclusive needs of the customers and are illustrious to a new level of rapid and personal attention. Duel Currency Credit Cards which is introduced by CBL for the first time in Bangladesh. City Touch app is one of the new version of online banking and came up with varieties accessibility of customers like to do fund transfer, pay order, cheque requisition, cheque stop, buying movie tickets and lots of through highly secured manner. In November 2009 The City Bank has launched American Express Gold Credit card & Platinum Amex card. CBL came up with completely new offers for the AMEX card holders. The City Bank Limited was one of the twelve Banks of Bangladesh amongst the 500 Banks in Asia for its deposit & profit, asset as assessed by "ASIA WEEK" In the Year 2000. CBL also receive the honor form Prime Minister to be the one of the top ten companies.

CBL manages its business and operation vertically from the head office through 4 distinct business divisions namely

- Corporate Investment Banking
- Retail Banking (including cards)
- Treasury & Market Risks and
- SME Banking
Bank ensures the customers treatment and facilities through prompt service delivery and strong IT backup which are based on such centralized model on these 4 divisions.

2.2 Corporate profile of The City Bank Ltd:

How the CBL organized the top line in a picture
2.3 Branch Management Organogram of The City Bank Ltd:

Customer Relationship Officers

Teller Group
2.4 Divisions of The City Bank Ltd:

It would be terribly problematic to manage the organization effectively, if the works don't seem to be planned considering their interrelatedness allotted during a department. If the divisions don't seem to be tailored for the actual works, there would be random scenario and also the performance of a selected division wouldn't be measured. CBL restricted organizes this work all right. There are:

- Human resources Department
- Audit Department
- Corporate Banking Division
- Finance Department
- Marketing Department
- Retail Banking Division
- Treasury Division
- Trade Service & Correspondents Banking Division
- Loans and advance Division
- Card Division
- SME Banking Division
- Information & Technology Division.
Chapter Three

3.1.4.1 **Target Market of Retail Banking**

Basically the commercial banks are doing their business focusing on retail banking. That’s why their target market is very large and wide regardless of gender, professional or age. To attract and encourage woman banking, City bank has recently launch City Alo banking. To make the banking easier and hassle free, i-banking service like Citytouch is provided. So these all new features and services are coming for the targeted retail customers.

Mainly government officers, non-government officers, business persons, professionals or land owners who have regular monthly income with financial capability are under the retail banking target market. As well as the housewives and students are also a large part of target market.

For running a safe business banks are mainly target established entrepreneurs whose monthly installment do not exceed the one third of financial gain.

So it can be identified that the target customers are for retail banking:

- Govt. and non govt. officers,
- Salaried person,
- Business owners,
- Professionals,
- Housewives,
- Students,

3.1.4.2 **Potential Target Market of Retail Banking:**

Retail banking has huge potential market if the banks can give more concentration and effort to some sectors. The potential customer sector can be identified:

- Non customers: Who are not the customer yet of the bank as well as the younger potential customers.
• Low income customers: Who have limited or low income and limited need of financial products. Who have very limited saving capability.

• New entrepreneur: New graduates or running students who want to boom as new entrepreneur can be potential customer for future by making them to avail low interest rate loan.

• Inactive customers: Who once were customers of the bank but somehow stopped their transactions may be for any reason or without reason.

3.1.5 Internet Banking:

As everywhere digitalization is coming up City Bank has started providing I-banking service to the customers. Customer can get immediate service or solution 24hour and 7 days from any place through internet banking. There are two types of product or service:

• I-Banking

• City Touch

➢ I-Banking: Customer can get or see account summary and account details at any time. Any cheque book related inquiry can be asked through i-banking. There is no extra charge for i-banking services.

➢ City Touch: City Touch is one of best online banking services ever given to the customers without any fee or charge. City Touch has been recently launched and got so many appreciations because of the security assurance with great facility. The main motto of City Touch is to save time both the customers and bankers. The person who has an account at City bank and a Debit card, he/she can sign up at City Touch app. The features of City Touch are following:

• Account Summary and Details

- Utility bill payment
- Open FDR and DPS account
- Loan statement
- Buy movie ticket
- Buy domestic air ticket
- Shop through online portals like Akhoni.com from Agora, Meena Bazaar.

3.1.6 SWOT Analysis of CBL

Every institution has their own strength and achievement. The City Bank is a globally recognized banking institution who is one of the first Bangladeshi members of SWIFT (Society for Worldwide Inter-Bank Financial Telecommunication). There are number of strength which has made CBL one of the top banks in our country as well as there are lots of opportunity and scope to reach oncustomer’s first priority list.

The strength of CBL are following:

1. Wide network range locally and globally.
2. Efficient and effective management.
3. Highest security online banking.
4. Dual currency visa card.
5. Strong financial position.

6. Member of SWIFT.

7. Faster service and solution of banking problem.

9. Effective marketing policy.

10. Innovative with product and service.

The Weakness of CBL are Following:

1. Controversy on centralized system.

2. Insufficient ATM booth.

3. Lack of freedom at work.

4. Lacking on good customer relationship.

5. Complex security shell makes customer uncomfortable.

The Opportunities of CBL are following:

1. Growth of SME banking.

2. Scope of financing on youth entrepreneurship.

3. Scope on corporate financing.

4. Technology advancement.

The Threat of CBL are following:

1. Interest rate fluctuation.

2. Loosing customer.

3. New comers.

4. New rules against giving loan.
Chapter Four
4.1 Recommendation

As bank is a service provider and it works with money, there are number of scopes to improve their service and financing on every different ways. Gaining customer loyalty, trustworthiness, making good customer relationship, understanding the market are more important than increasing number of customers. CBL should make new plan to how to keep loyal customer and understanding what customers want. CBL should minimize the service gap on customer objection, expectation and perception. Some steps can be taken by CBL for meeting the customers’ expectations and increasing company’s growth as well as goodwill:

- Though CBL’s objective is to provide services to all income segments of customers, but the initial deposit amount is 15000/-. Thus it is not possible for all segments of people to open an account in CBL. So the bank should review its policy of the initial deposit amount.

- The products of CBL are very lucrative. But the minimum income for loan application is very high and there are too many conditions. So customers sometimes find it difficult to apply for a loan. It should be affordable for customers. As per customer response, CBL is taking long time to process & disbursed the loan. More easy way should find to minimize the duration for loan process.

- Customers are confused about the loan pricing & hidden charges, so CBL should informed the customer about the different fees & installment size of that particular product. Customers are demanding more SME Service Center & Branches in their locality which will help them regular transaction with them.

- CBL is needed to reach the brand value to the customers for building up ideal relationship to create loyal customer. CBL should maintain errors-free customer’s record & database which will help to identify the major customer’s facility requirements. They should invent other type of deposit to attract more customers which is different from other banks.

- The e-banking services are good but customers expect more. Many customers are not accustomed to English interface so they need Bangla interface for the ease of using e-banking. Citytouch, it can be more user-friendly and prompt. The security features are good but customers sometimes find it difficult and time consuming. So the app should be made user-friendly.
CBL should take steps for employee training on regular basis to make them more customers friendly and effective as well as efficient. CBL can emphasize on maintaining more cash and deposit balance. They should come up with some discount offer for regular customers. They can encourage young customers with lesser service charge and offers. Internal IT problem should be solved very quickly. The renovations of different branches should be done quickly. The employees should be selected based on area and branch which will help to gather more customers. They should increase more ATMs and minimize the card capture problem. The loan process and disbursement should be made within a certain time. They should be more employee friendly to make out good service.
4.2 Conclusion

From the very beginning of our country’s development the private banks are doing amazing job. People are concerned about to save their money for future investment and take loan to buy or do something within a certain time. If a person wants to start up any business, he need not to wait for collecting money for years rather than he can take loan for executing his dream. Because of customer demand and opportunity lots of commercial bank has come and established in last few years. City bank is helping the country with their service for more than 25 years. They have improved their service a lot and for customer demand they have opened the branches almost all over the Bangladesh. CBL is helping our economy by remitting of funds. Banking has expanded their service to meet the every financing solution for both the each client and corporate clients. The new challenge for every sector is making digitalization. Almost every function and job are delivering on digital way. Citytouch is the most unique with best online banking service of CBL. Citytouch is upgrading day by day and people are getting banking service at their home.

This report has focused mostly on the service and product of CBL and identified important information that could make the banking service more attractive to customers. The performance and creative steps of CBL will surely help them to make one of best private banks in near future.
