United International University
The report paper on “foreign exchange operations of City Bank Limited” is a great pleasure to me to complete. I have taken great aptitudes to complete this report. With the kind, help of the faculty member encouraged me to do this on time.

Firstly, Thanks to Allah for his helpful gratitude to complete this report. I am giving thanks also to faculty “Nusrat Farzana” madam who supported me a lot and guided me to finish the project report from first to last.

I would like to express my gratitude to my parents for their continuous support and prayers. Their support and motivation encouraged me to overcome any obstacles and complete my BBA.

I would like to thank my friend who has supported me and helped me to accomplish this report by providing proper information. Without these help, I would face difficulties but this kind support helped me to complete the report.

Also indebted to those websites and information desks that provided me information and I tried to use those data properly to complete this report.

However, any reader or faculty may find my report error some in editing or any misinterpretation mistakes. Apart from this any correction and suggestion from any person is warmly welcomed.
Executive summary

The Internship report is about foreign exchange and its policies of City Bank Limited. In this report few issues are presented. At the very beginning, purpose of the report, introductory lines, scope of the report are discussed. Then, an overview of city bank is presented. Here we can show when City Bank started. How its journey, branches, mission, vision, its class of products. Bank account etc. are presented. After introductory part, the most of important concept of this report about foreign exchange business of City bank limited is represented. Here any-one can know importance of international trade, export, import and remittance. Here types of letter of credit are written down. Class of importers, how L.C can be opened and payment procedure are discussed. And overall foreign exchange related terms are tried to present. Then analysis part has started. Analysis of foreign exchange performance is written down. Here 5 years export performance; 5 years of import performance and remittance are presented. Here also talked about current trend of foreign exchange and future condition are presented.

In this report another analysis is also talked about which is may be not directly connected in this report title. But report decoration a comparative financial performance is discussed. Here 5 banks are selected for the comparison analysis. To see City bank financial position along with 4 banks and industry average, a comparative financial performance or ration analysis talked about.

At last a little bit findings are found out. There are some problems which can be easily solved. And here some sorts of suggestion are given. Finally this report has done.

Chapter 1

Introduction of the Report
1.1 Introduction of the report
In the modern economy, it is very impossible to do work without a bank. Banks help to us to grow our economy very smoothly. Today Banks working not limited with traditional activities. Where money is present, banks also present there. Now we do business only country but also abroad. To do business outside of country we must need help from a bank. Thanks to banking sector to make easy foreign business. Without banks to do business with over-sees country is impossible.

This report deals with foreign exchange operations of the City Bank Ltd. In Bangladesh there 62 listed banks. Foreign exchange is one of the biggest activities among the banks. As a student of BBA it is very important to gain practical knowledge of business world. And it is also pre-condition to gain my degree requirements. I am lucky because I get an opportunity to do internship in City bank of foreign exchange division.

During my internship time I worked to City Bank Ltd., Nikunjo Branch for 3 months. Here I saw how a bank practically deals with foreign activities.

1.2 Background of the Report
As the part for the pre-requisite of Bachelor of Business Administration program this report is made by me. And my supervisor has directed me to make this report correctly. Here I try to show some foreign exchange activities of City bank. How they deal with foreign exchange activities with foreign countries and there is some analysis of there for foreign activities performances. I worked to City Bank ltd. of Nikunjo Branch. I try to show latest foreign exchange activities. Here I will try to present my experience and others on. Besides I try to present a comparative analysis which helps to determine position of financial activities.

1.3 Scope of the report
The report is made for to show foreign exchange operations of City Bank Ltd. Here we try to focus Importance of various types of LC. Factors of determining foreign business and trade, risk and specimen of L.C documents. Along with 5 years export-import analysis. Here we will see some processes for international business procedures. Impacts of remittance and foreign exchange activities are presented there.
1.4 Objective of the report
- Primary purpose is analysis the various foreign exchange related activities.
- To examine and understand the overall Activities especially foreign exchange operations activities.
- To recognize basic goings-on of banking activities of CBL.
- To gain knowledge importance of foreign exchange banking.
- To analyze the administrative atmosphere.
- To recognize the foreign exchange guidelines and rules.
- To show a comparative performance of City Bank.

1.5 Methodology of the study
This full internship report arranged depending understanding gathered throughout internship period. For collecting data of this report, I have collected data from various sources and various divisions of the city bank and other banks. I have presented my data collection through various chart and graphs. For preparing a genuine& reliable report I personally have studies entirely the available corporation’s data from firm’s website, past records and so on. Most importantly I have collected data through conversation with the banks’ staff and governing bodies.

Primary Sources
-✓ Asking questions with executive officers
-✓ Direct observations with the customers of the bank.
-✓ Used my practical knowledge during internship period

Secondary Sources:
-✓ City Bank Ltl’s’ official histories.
-✓ Foreign exchange related documents
-✓ The City Bank Ltl’s’ Official website
-✓ Books
-✓ Bangladesh Bank websit
1.6 Limitation of study
There is existing some limitations contain in this report:

✓ Restriction on getting Confidential of The City Banks’ Ltd financial information.
✓ Limitation of the furthermost recent statistical data.
✓ Limitation of getting information those are mandatory for report creation, as they will not reveal internal info.
✓ Assumptions are used in some analysis areas.
✓ Lack of knowledge.
✓ Chances of mistakes.
Chapter 2

Overview of the City Bank Limited
2.1 Company profile
City Bank began its activities in 1983 underneath the entrepreneurship of 12 prominent & famous businessperson of the country along with an authorized capital of Tk. 1.75 Billion. This financial facility is specially made to full-fill the needs of our daily life which is fully Shariah compliant.

2.12 City bank treasury and market risk division
Overnight deposit occurred when the fund are borrowed very quickly over a night. Mainly it is known as call money market.
Chapter 3

Foreign Exchange Business and Basic Concepts
3.1 International Trade
If anyone can walk into a market place and see South American bananas, Brazilian coffee and garments of Bangladeshi, anyone experiencing the impacts of international trade. International trade is the exchange of products and services between 2 or more countries.

3.2 Countries when gone to International trade
International trade permits among countries to increase their markets for both products and services that otherwise may have been unavailable domestically. As a result of international trade, the market holds bigger competition, and therefore more competitive price tags, which brings a lower cost goods home to the customer.

Two or more countries do business with each other when they do not have enough the resources, or capacity to satisfy their own needs and wants. By increasing and exploiting their own scarce resources, countries can grow a surplus and business this for the assets they need.

3.3 Factors determined International trade in Bangladesh
Bangladesh is import based country. The Country has ranked of 123rd positions among the countries. Every year we hugely import food and non-food items. Because of we have lack of resources to produce goods which we need. We import our products from India and china mostly.

Along with we export RMG, medicines and man-power. Our economy is growing well. So these need influence us to do international trade.

3.4 Risks of International trade
Risks in International business are the major problems for the increasing to the same. Recent China-USA trade is one of them. Economists have identified on the exact benefits of international trade. This growth in the export market is highly helpful to an economy, but on the other side the increase in imports can be a challenge to the economy of that country. It has been the tense of the policy makers to halt the right balance between free trade and restrictions.

There are some risks which are given below:

- Economic risk
- Political risk
➢ Commercial risk
➢ Natural risk

3.5 Terms related International Trade
There are a very good number of terms regarding International trade. Here I try to present some important terms.

➢ FOB: FOB defines the shipper/seller uses his freight forwarder to shift the merchandise to the port or listed point of origin. Though frequently wont to brief to movement of cargo, FOB means to ocean or inland waterway transportation of products. “Delivery” is employed when the vendor opens the products to the buyer’s address. The buyer’s responsibility for insurance and transportation starts at an equivalent time.

➢ FCA: In this type of financial transaction, the seller is responsible for making transportation, but he is playing at the risk and the cost of the buyer. In FCA the seller decides and tasks with the freight forwarder or the carrier. “Delivery” is added at a fixed sea port or point and the buyer takes roles for Insurance.

➢ FAS: The buyer takes all the transportation expenses and the risk of loss of products. It needs the seller to clean products for export, which is a reversal from previous practices. Companies selling on these words will ordinarily make their freight forwarder to clear the goods for export. “Delivery” is added when the products are turned over to the Buyers Forwarder for safety and transportation.

3.6 Letter of Credit
A letter of credit may be defined as a written intimation from the foreign buyer’s bank that they have been instructed to open a credit for a define amount of products to be exported against documents supplied all requirements of the Credit is accepted with. This L.C is must need to international business.

3.7 Types of letter of credit
1. Letters of Credit can be classified
(i) Revocable (ii) irrevocable.
A revocable letter of credit is one where the issuing bank holds the right and own to cancel or modify or adjust the credit at any time without giving prior notice of cancellation to the
beneficiary. A revocable letter of credit does not make a legally binding undertaking between the banker and the exporter. Such credit gives no real security to the exporter. But, if there is a specific provision in the letter of credit that notice of cancellation should be given, the banker must abide by it.

An irrevocable letter of credit is one, which may not be revoked, varied or changed without the consent of all-party’s buyers, seller, issuing bank and confirming bank.

2. Confirmed and Unconfirmed Letters of Credit.

When the opening bank request or make urges the confirmation letter, such undertaking cannot be cancelled or modified without the agreement of all concerned parties. A confirmed irrevocable letter of credit provides and gives absolute security to the beneficiary. The opener asks the issuing banker, at the request of the beneficiary, to arrange and make a confirmed credit. The confirming banker takes upon himself the liability and take undertaken similar to that of the opening banker.

An unconfirmed letter of Credit is one, which does not bear the confirmation of the advising banker. There will be no such obligation or restrictions on the advising bank.

3. Fixed and Revolving Letter of Credit:

In the letter of credit the amount up to which one or more bills may be used by the beneficiary within the specified period of time. Such credit is called a fixed credit. The opening banker defines not the total amount up to which bills may be drawn, but the total amount up to which bills drawn may stay outstanding at a time. The amount of credit stays constant during the period of validity. When a bill is drawn, the amount gets down and when the bill is duly honored, the credit amount is renewed. That means, as soon as any of such bills is paid by the importer, the beneficiary may draw another bill/bills under the letter of credit. Revolving credit is thus automatic and does not need renewal within the specified period of time.

4. Transferable and Non-Transferable Letters of Credit

The beneficiary/ exporter are authorized to draw bills of exchange under a letter of credit. But if the beneficiary is an intermediary or primary in the transaction s and the goods are actually to be
supplied by someone else, the beneficiary may request the opener to arrange a transferable letter of credit. L.C exporter can transfer and shift his right to draw a bill to somebody else. The letter of Credit cannot be transferred by the beneficiary to other parties is called Non-transferable Letter of Credit.

5. Documentary and Clean letter of credit:

A documentary or secured letter of credit is one which the issuing bank takes responsibility to honor the bills drawn under it only when it receives with it certain documents such as bill of landing, insurance policy, in the beneficiary is authorized to draw bills of exchange under a letter of credit. The documents are held by the issuing bank as security for advance made by it. A clean or open letter of credit is one where no documents or any type papers are involved. The issuing bank undertakes to honor the bills without production of any documents. Such a letter of credit is issued for customers of high financial standing.

6. ‘With’ and ‘Without Recourse’ Credits

Bills of exchange may be drawn or issued under the letter of credit ‘with recourse to the drawer’ or without such recourse. In case of ‘with recourse’ bills, the banker keeps role as holder of the bill, can recover and back up the amount of the bill from its drawer, in case the drawee of the bill fails to honor it. In order to avoid such liability and difficulty, the exporter may ask the importer to arrange credit ‘without recourse’ to the drawer. Under this type of credit, the issuing banker will have recourse and renew to the drawer only and if he fails to honor the bill, the banker can realize the amount by disposing of the goods. The liability of the drawer of such a bill of exchange ends as soon as it is negotiated and transferable.

That means, in case of a letter of credit with recourse; the beneficiary of the letter of credit holds himself liable to the holder of the bill in the event of dishonor. Where the beneficiary does not hold liable, such a letter of credit is known as without recourse letter of credit.
7. Red Clause Letter of Credit

Often the seller or the exporter needs credit for purchasing of raw materials, processing them into final products, packing and dispatching them to the port town. Such credit is called ‘packing credit’. A red clause letter of credit enables him to secure such packing credit from the banker advising such credit. A red clause letter of credit is one which contains an authority from the issuing banker to the advising/negotiating banker to grant advance for short period to the beneficiary up to a specified amount at the responsibility of the issuing bank. The particular clause in the letter of credit uses to be generally printed in red ink and so is known as red clause and the credit is known as red clause letter of credit. The advance made under this letter of credit is recovered from the amount, payable by negotiating banker to the beneficiary when the latter negotiates the required documents under the letter of credit.

9. Back to Back Credit:

It happens or occurs that sometimes exporters may receive letter of credit from foreign buyers for export of goods to them but the exporters may not be the actual manufacturers or producers of the exportable goods. They have to procure the goods from the manufacturers or producers, from within or outside to enable them to complete the deal under the L/C. Actual manufacturers/producers may not supply the goods unless the payment of the goods is guaranteed by the bank in the form of opening letter of credit in their favor.

For that purpose, exporter may approach his bank, by exhibiting and lodging the said export L/C, to open another credit in favor of actual or real supplier/manufacturer of the goods on the strength of the export L/C. The two credits operate “back-to-back”, one being issued on the security of the other. Thus, a “back-to-back” credit transaction involves two separate credits, where in the beneficiary or exported of the first credit becomes the applicant of the second credit.

3.8 Steps of export and import letter of credit

The liability of opening banker in respect of a letter of credit is absolute and firm. He should, therefore, open a letter of credit with care and after having been satisfied with the financial standing and creditworthiness of the application, at whose request a letter of credit is issued. The following steps are taken in this regard:
1. **Application for letter of credit:** The applicant fills a prescribed application from requesting the bank to issue a letter of credit in favor of the foreign supplier and gives an undertaking that the bills drawn under the letter of credit will be accepted and paid by him.

The applicant is required to give in the application all necessary particulars and terms etc. on which the credit is to be opened. e.g.,

(a) The amount for which the credit is to be opened and the nature of credit.

(b) Details of the goods to be imported and their prices and other terms.

(c) Details of shipment-port of shipment and destination, time of shipment, last date of shipment. Whether partial shipment allowed or not: whether transshipment allowed or not.

(d) Details of the shipping and other documents which are required to be attached with the bills of exchange. For example,

1. Invoice
2. Bill of Landing
3. Railway Receipt/ Air consignment Note

The nature and extend of risk to be covered by the insurance police should be clearly indicated.

(e) The tenor of the Bill and the name of the drawer of the bill to be drawn.

(f) Whether the letter of credit is to be opened by mail/air mail/cable.

(g) The date of expiry for the presentation of the documents for payment, acceptance or negotiation.

(h) Whether the letter of credit is to be confirmed by the advising bank. Who will bear the confirmation commission- buyer or seller?

(i) Details of the import license.
2. **Scrutiny of the Application:** The application submitted by the applicant must be carefully scrutinized by the opening bank to ascertain the following:

(a) That the means and standing of the application is good.

(b) That the importer is in possession of the Import license granted by the Import Control Authorities. The banker should verify from the import license that—

- The import license is in the name of the applicant.
- Types of goods to be imported as mentioned in the license conform to the details given in the application.
- The country of the origin of the goods as given in the license is the same as given in the application.

(c) That the goods to be imported under the letter of credit should be readily marketable.

(d) The price of the goods to be imported should be approximate current market value and it should not be liable to wide fluctuations.

3.9 **Document required for LC**

*Regulatory Documents*

- Board of Investment approval (BOI) with Machinery List
- Valid Import Registration Certificate (IRC)
- Valid Trade License
- TIN Certificate
- Last Year Tax Declaration
- VAT Certificate
- Valid Membership Certificate
- Board Resolution regarding signatory of Import document
Other Documents

➢ Indenter IRC, Bangladesh Bank Approval & agreement copy with principal
➢ Valid Credit Report of the supplier
➢ Bank Approval

Transaction Documents

➢ Customer request Letter
➢ Documentary Credit Application Form
➢ Letter of Credit Authorization Form (LCAF)
➢ Pro-forma Invoice/ Indent
➢ Insurance cover note, money receipt & form GA

3.10 Payment procedure
There are 4 payment procedures

- Open account
- Advanced payment
- Documentary collection
- Documentary credit

Here I try to discuss documentary credit method system. First importer makes a contact with exporter. Importer will go to issuing bank for opening LC application. the issuing Bank sends letter of credit to advising Bank. The advising bank will send LC as advice to the exporter Bank after getting the LC Explorer will send the goods through shipment. Now the exporter will send documents again to advising Bank then the advising Bank send documents to the issuing Bank. The issuing Bank send payment to the advising Bank then the advising Bank gives payment to the exporter. The issuing Bank sends documents to the importer.
3.11 Foreign exchange business of City bank Ltd.

**Finance of trade:** City Bank’s business finance is ready-made to fill-up the individual wants of any business. They will support albeit any company has few unstructured credit boundary, thanks to reasons like limited financial assets or sudden spike requirements. That’s because their risk assessment concentrates more on one activities diary, existing activities and collateral valuation.

**Letter of credit for importer:** While purchasing products from abroad exporter, anyone can bring the products within the define quantity, on time and at the defined place. Anybody also will desire to form payments only after receipt of the required documents including the title of products.

City bank can resolve demands by giving a credit on behalf. A documentary credit is Bank's guarantee of payment for a shipment of products against specific documents as mentioned on it.

By conducting a LC, the bank making payment after receipt of titles and other documents that should totally agree with the terms of the credit.

**Back to Back Letter of Credit:** A Bangladeshi Businessman who has a garment business gets an order from USA. Here use of L.C must open. The Bangladeshi Business man can use this LC as 2nd LC to import Raw Products from China.

**Classification of importers**

Based on good and products types of importer can divide into 3 ways:

1. Personal
2. Commercial
3. Industrial

**Import Policy:**

There are some instructions from government about policy of import. Some products need to permission to enter the country. Some products need not grant to access to country. Some products can easily enter without any obstacles. So in export-import business policy of import is necessary.
L/C Opening:
If an importer wants to import some goods or products from outside the country, initially he has got to apply or hospitable a bank for opening a L/C. Letter of Credit (L/C) may be a paper document written undertaking or take responsibility of a bank written to the vendor and issued at the request of the customer to pay at site or a determinable future date. Consistent with Import Policy, unless or otherwise specified, all import is to be made or must by opening irrevocable letter of credit. L/C are often opened or registered against Performa invoice if the exporter has no agent and L/C are often opened against Indent if the foreign supplier has indenting agent.

Procedure involved in L/C opening:
There are few steps involved in L/C opening process. These are: -
➢ First fulfilled the form.
➢ All the documents need check and scrutinize.
   a. The amount and description of goods should be matched with form documents.
   b. The insurance amount must be present.
   c. The product should out of restrictions.
   d. Exporter and importer signature must be given at defined area.

Collection of bills of Import
By enwrapping supplier to emit their shipping documents to City Bank, business person will relax prompt advice upon bank’s receipt of documents and efficient payment consistent with owner orders.

Exports letter of credit
If anybody does export business, City Bank can support you with Export Letter of Credit advising, Letter of credit Safekeeping, Letter of credit Confirmation, Letter of Credit checking and negotiation. For financing supports, holds to Pre-shipment Export Finance, Export Bills for collections, invoice financing.
Export letter of credit confirmation:

There a document which need conformation from a define banks. Exporter and importer need these documents. Bank arrange this documentary for business holders.

Pre-shipment export financing:

The bank gives pre-shipment finance against irrevocable letters of credit from or buys orders in an amount of currencies to permit you to business with confidence. If any- one needs or requires fulfilling a sales contract but need funds to buy raw materials or process products for export, City Bank proposes you pre-shipment export financing in a different of currencies.

Document preparation:

Advantage for cheap costs, speed performing and lesser faults - outsource to City Bank the documentary work and admin working related to export functions fundamental on L.C or purchase order.

3.11 FOREIGN REMITTANCE

Foreign remittance:

Remittance defines shift of money from one destination to another address through accepted way. Foreign remittance means the money come from abroad that are received in, from overseas.

Two types:

1. Remittance of inward
2. Remittance of outward
Foreign inward remittance:

Types of inward remittance are:

1) Repatriation from export proceeds
2) Foreign aid
3) Earners of wages
4) Commission of indenting
5) Donation,

Modes of Foreign Inward remittances:

1) SWIFT transfer.
2) Foreign Demand Draft
3) Cheque of travelers
4) Currency notes and coins.
5) Receipt of taka draft

Inward Remittance

Foreign Demand Draft

If any bill is send to the name of any institute from overseas then the draft is fill-up from "C" where the draft holder is to fill-up send this draft, from where this draft has been sent etc. If family intention or not, if the draft has been family purpose then no Value Added Tax is needed against the draft. For payment of draft concerned maintains a register.

Telegraphic Transfer

TT Is one of the top elements of foreign money from one country to another. The person who wants to send Telegraphic Transfer to the overseas at first s/he has to deposit amount mentioned in voucher to the cash department. It is generally activated by the bank branch by their respective NOSTRO ACCOUNT maintains any foreign bank account outside the country. The bank sends a confirmation to the paying foreign bank for making payment against the listed TT. The foreign make payments to the party and also make debit 'Account' against mentioned bank.
**Sales of TC and FC Notes:** To find TC and FC Notes at least the consumer has to submit an application form filling-up the defined column, which is formatted by the bank is known T/M form. After making checking the form the desk officer allows voucher and issues a TC and gives cash dollar to the customer. In both the cases the banker endorse total amount in customer's passport. The banker needs photocopy of customer's passport and endorsement documents. The fees of endorsement has taken by the branch is Tk.200 only. Sales of TC and FC and Notes amount differ from different countries:

Chapter 4

Export-Import business and Comparative financial analysis of City Bank Ltd
4.1 Export-Import Analysis

4.1.1 Trend Analysis

Export-Import Business
Bangladesh is import based country. It mostly depends on China and India for import purposes. But its export graph shows a positive picture of total economy. Different types of products such as RMG, medicine, jute etc. are exported around the world.

Foreign Remittance
One of the biggest pillar of our country. Almost 1 core people worked around the world. And send money and make the country development without any interest. We have 32 million reserves and biggest pert come from man-power.

Trend:
It indicates the changes in the level of the variable in absolute term i.e. in original units of measurements. Moreover, trend indicates whether the variables are changing over a period of time.
To evaluate the performance of the City Bank Ltd. CBL, we need to focus on the following variables, which are lined below:
1. Export
2. Import
3. Remittance
4.1.2 LAST FIVE YEARS EXPORT BUSINESS PERFORMANCE OF THE CITY BANK LIMITED.

Table 1

Graphical presentation of this Data:

![Market fund- liquid asset/Total assets](image)

Figure: 1 Market Funds Position. (Market Funds – Liquid Assets) / Total Assets.
Comments:

- Among all the Banks, (market fund minus liquid asset as a percentage of total assets) market fund position is much good for Islami Bank Bangladesh Ltd as 73.51 % highest.
- **City Bank** market fund position is not steady at all; Janata bank carries a firm market fund position which is highest at 32.15%.
- From the Industry mean scenario, we can see that market fund condition as a percentage of total asset is almost same in this 5 years, it is as between 20-24%, highest in year 2014 which is 24.65% and lowest in year 2017 which is 20.96%. But **City Bank**’s performance is not up to mark compare with Industry mean.

### 4.2.1.2 Liquid Assets to total asset ratio. (Liquid Assets / Total assets)

</tbody>
</table>

Table 2

Graphical presentation of this Data:

![Liquid Asset / Total Asset](image-url)
Comments:

- Liquid assets to total assets tell the whole liquidity condition of the bank. In this graph we see that overall liquidity position of Islami bank is good as every year, and Dhaka Bank also holds a steady position from last four years.
- **City Bank**, Janata Bank and Southeast Bank are approximately in the same situation, they hold a minimum liquid asset.
- We can take a look in the industry mean, here in 2014 liquid assets was at minimum level, highest in 2015 and then at a same level in every year.

### 4.2.1.3 Core Deposit to Total Funding ratio. (Core Deposit / Total funding).

<table>
<thead>

<td>88.82</td>
<td>87.23</td>
</tr>
<tr>
<td>Industry mean</td>
<td>82.86</td>
<td>85.76</td>
<td>84.06</td>
<td>82.16</td>
<td>79.50</td>
</tr>
</tbody>
</table>

Table: 3

Graphical presentation of this Data:

![Core deposit/ Total funding](image)

Figure 3: Core Deposit / total funding
Comments:

- This ratio focuses on how much fund bank collects from deposits. If we take a look to the graph, every bank collects most of their funding from deposits, we also know it is the biggest source of bank to collect money.
- From the graph, City Bank’s deposit collection is minimum compared to others four banks.
- If we focused in the industry average, Deposit collection ratio is satisfying in every year.

4.2.2 Profitability:

4.2.2.1 Return on Average Assets ratio. (Net Income After Tax / Average Total Assets).

<table>

</tbody>
</table>

Table: 5

Graphical presentation of this Data:

Figure 5: Return on Equity ratio
Comments:

- Return on equity is a tool of financial activities. From the graph we can see that every bank contains approximately the same level of ROE ratio, if one bank does well in a year then another bank done this next year, consistency is very poor. City Bank’s ROE is not good and also same for other banks.
- An acceptable ROE ratio is considered as 14% and less than 10% is poor. So from the table we conclude that the ROE scenario of this bank is not much good.
- If we look forward to the industry average, from 2014 – 2017 ROE holds an acceptable position, but in 2018 it goes down as 7.74%.

4.2 2.3 Net Interest Margin. (Net Interest Income / Average interest-earning asset)

Table: 6

Graphical presentation of this Data:

Figure 6 Net Interest Income / Average interest-earning asset
Comments:

- Net interest margin is a tool that measures how successful a firm is at investing its funds in comparison to its expenses on the same investments.
- **City’s Bank** holds good net interest margin.
- Southeast bank and Islami bank hold a high net interest margin in every year but Dhaka Bank and Janata bank falls to maintain a standard rate.
- In the industry average, an average ratio contains every year that is approximately 4.5%.

### 4.2. 2.4 Return on risk adjusted capital. (Net Income / Average RWA).

Table: 11
Graphical presentation of this Data:

![Graph showing allowance for loan losses/Gross Loan](image)

Figure 11: Allowances for loan losses/Gross Loan

Comments:

- This ratio shows how much a firm has loan loss reserve against its gross loan.
- From data, we can see that the industry on an average has 0.80 to 1.31 reserves for its gross loan. According to Bangladesh bank rules a bank should keep general provision from .25% – 2% based on risk associated with the account. From the above information, we can observe that all banks are maintaining this limit.
- Therefore, it can be conclude that banks will have sufficient fund at the time of fund requirement.

Table: 17
Graphical presentation of this Data:

![Shareholder Equity/Total Assets](chart.png)

Figure 17: Shareholder equity/Total asset

Comment:

- Shareholder equity describes the percentage of total assets that arranged by using equity.
- The industry mean varies from 6 to 7 percent which indicates that the uses of equity regarding assets management is not so high.
- Only the **City bank** & Southeast bank are using higher percentage of equity in some certain year than that of their peer group.
Chapter 5

Findings of analysis
Findings of City bank

✓ The City Bank limited foreign exchange Business performance growth rate is 10.06%, 43.23% & 25.81% at year 2018, 2017 & 2016 respectively.
✓ The City Bank Import foreign exchange business growth rate is 5.63%, 63.36% & 26.88% at year 2013, 2012 & 2011 respectively.
✓ The City Bank Export foreign exchange business growth rate is 22.42%, 13.77% & 36.12% at year 2018, 2017 & 2016 respectively.
✓ The City Bank inward Foreign Remittance growth rate is – 0.06, 0.73% & -0.11% at year 2019, 2017 & 2016 respectively.
✓ Export and Import financing Facility for customers is available
✓ Export and Import financing interest rate is Export financing 7% fixed and import financing 16.5% + (3% to 5%).
✓ City bank holds a high net interest margin in every year compare to other banks
✓ Islami bank is good liquidity position in every year, and Dhaka Bank also holds a steady position from last four years. Janata Bank, City Bank holds good liquidity position.
✓ According to Bangladesh bank rules a bank should keep general provision from .25% – 2% based on risk associated with the account. From our analysis, we can observe that all banks along with City bank are maintaining this limit average .25%-2%. Therefore, it can be conclude that banks will have sufficient fund at the time of fund requirement.
✓ Banking sector is in trouble to collect their problem loan. In 2016 banking sector has the highest problem loan.
✓ City bank Southest bank are using higher percentage of equity in some certain year.
Chapter 6

Recommendation and conclusion
6.1 Recommendation

✓ Bankers can promote the relationship with their corporate customers for enhancing Letter of credit opening.
✓ The bank should actions prepaid foreign currency travel card for customers traveling around the world.
✓ The bank may promote some promotional programs to promote export. If bank gives more importance to export parties they will be impacted.
✓ The bank should supply Export and Import financing oratory at a low interest rate to expand opening letter of credit and processing time should be speedy.
✓ The bank needs to make better efficient management system. Higher authority should give more importance about the efficient management obstacle.
✓ The City bank should supply Foreign Currency (FC) account opening facility for NRB clients.
✓ The maintaining charge for the account should be lower and competitive.
✓ The bank should make a monthly /quarterly training courses /workshops for the selected by the authority in order to increase employee to their desired level.
✓ Annual student file maintenance charge should be reduced
✓ Fees in foreign exchange include SWIFT charges, Document Handling Charges, Stamps Charges as well as VAT. If charges could be curtailed, Bank will definitely attract more customers.
✓ The banking sector may adopt new policies to select borrower selection.
✓ The banker can invest good project and good borrowers which may create win-win situation.
✓ They should be careful against problem loan.
✓ New product should be created. Only depending on deposit account may create liquidity and solvency deficit.
✓ The authority should rethink to permit a new bank for this current economic situation.
6.2 Conclusion

The City Bank does their best in international business transactions. In this report I try to present about foreign activities, performance of city bank etc. I hope I give my best here. The banking sector is the economic sector which highly makes to the holding of financial assets for others investing those financial assets as leverage to create more wealth and the regulation of those activities by government agencies. It has a major impact on the total economy of a country. Most of the developing country like Bangladesh of which economy is based on the banking sector mostly. But in the recent year, the banking of Bangladesh faces many challenges, especially for their non-performing loan. If they maintain proper management in borrower selection, they will be able to face the challenges.
