A project in the Department of Computer Science and Engineering presented
in partial fulfillment of the requirements for the Degree of
Bachelor of Science in Computer Science and Engineering

United International University

Dhaka, Bangladesh

October 2018

©UIU, 2018

Declaration

We, Saif-Ud-Dowla, Mahabub Hasan, S.M Rezai Rabbe & Md. Jillur Rahman, declare that this project titled, CDIP-CSE Alumni Management and the work presented in it are our own. We confirm that:

- This work was done wholly or mainly while in candidature for a BSc degree at United International University.
- Where any part of this project has previously been submitted for a degree or any other qualification at United International University or any other institution, this has been clearly stated.
- Where we have consulted the published work of others, this is always clearly attributed.
- Where we have quoted from the work of others, the source is always given. With the exception of such quotations, this project is entirely our own work.
- We have acknowledged all main sources of help.
- Where the project is based on work done by us jointly, we have made clear exactly what was done by us and what we have contributed ourselves.

[Saif-Ud-Dowla, 011 131 089, Department of Computer Science and Engineering]

[Mahabub Hasan, 011 131 032, Department of Computer Science and Engineering]

[S.M Rezai Rabbe, 011 131 017, Department of Computer Science and Engineering]

[MD. Jillur Rahman, 011 132 002, Department of Computer Science and Engineering]

Certificate

I do hereby declare that the research works embodied in this project entitled “**CDIP-CSE Alumni Management**” is the outcome of an original work carried out by Saif-Ud-Dowla, Mahabub Hasan, S.M Rezai Rabbe & Md. Jillur Rahman under my supervision.

I further certify that the dissertation meets the requirements and the standard for the degree of BSc in Computer Science and Engineering.

Suman Ahmmed

Assistant Professor & Director of CDIP, CESR

Department of Computer Science and Engineering

United International University

Abstract

Alumni association of an institute plays an important role to engage university people. Alumni is the face of an institute. They are often called university ambassadors. Alumni associations are often formed with universities or department of universities and may also formed with students that studied in IT professional training center like CDIP.

CDIP provides different types of IT industrial training for developing IT skills of students so that they can make themselves ready for both global and local market. The major point of our system is to provide CDIP-CSE alumni student information as a form of directory, various alumni activities like get together, event news and different types of job circular like part time, full time, contractual, project base for alumni students. The primary aim of CDIP-CSE alumni management is to support and guide the students with proper training so that we can bring them into IT industry. So, in our project CDIP-CSE Alumni Management, we are trying to build networking or communication among all CDIP-CSE alumni students so that alumni can help and support each other and make friendships and business relationships with people of similar background.

The project is designed to be accomplished in two states. The preliminary state will be the making of a simple system that will be used to collect data dynamically of current CDIP-CSE alumni students and the second state of evolution will come up with job information and job circulars.

Acknowledgement

At first, Thanks to Almighty. Without His blessings, we Wouldn't have been able to complete this project.

We would like to express our gratitude to our advisor Suman Ahmmed Sir for the continuous support of our project and for his patience, motivation, enthusiasm and immense knowledge. His guidance helped us in all the time of project and writing of this project report.

Last but not the least, we would like to thank our family, for their support and care throughout the life.

And of course, our institute United International University for being always helpful and provide guidance to become quality, spontaneous and more productive.

Chapter 1

Introduction

1.1 Problem Definition

The Alumni Association plays an important role in helping to shape the future of any university by representing the views of its members and contributing to building an engaged and supportive alumni community appropriate to a world class university.

Today, alumni relations are an important part of an institution's advancement activities for many reasons: Alumni are an institution's most loyal supporters. As CDIP is one of best IT training center where students acquire specialized IT knowledge and skills relevant to their discipline in order to advance IT, so there is definitely need a communication media where students information will be stored, where anyone of this organization find information, news and job-related supports from a complete usable website. We made this web-site which will assemble every student, instructor and organizational managements to access the CDIP community and for making better alumni events.

1.2 Motivation

Our website is for CDIP students and all alumni are fund raising prospects. They are the most likely group to give (if the institution has done its job right), as alumni should have a sense of gratitude and want their institution to succeed.

A strong link between alumni relations and fund raising will enable you to spot alumni who have the capacity and inclination to make significant gifts. It will also enable you to effectively segment the majority of alumni who might only give smaller amounts so that you can match them to ask that has the highest likelihood of success.

1.3 Objectives

The usage of this website is to get the entire Alumni of a particular institution together under one roof and to build a strong Alumni Network among the CDIP Community. Also maintaining Alumni Database and to inform the Alumni about the ongoing and future activities. There will be scopes for current students can get useful career guidance from the Alumni.

Chapter 2

Requirement Analysis

2.1 Background Studies

We conduct benchmark studies across a wide range of products which is already established in the website. We will show this wide range of applications key features and properties.

2.1.1 Dhaka University Alumni Association

Twenty-fourth September 1949, Nine years after the idea was mooted, the Dhaka University Alumni Association was born. This is oldest alumni association in our country which is successfully arranging their events and forums. To mention only one of about a dozen projects, DUAA offers about 400 scholarships every year through collecting donations and arranging a number of Trust Funds to each year of each department and Institute of Dhaka University.

Key Features:

This site has many useful features and key information those are as follows:

- Organization
 - Executive Committee
 - Sub Committee
 - Past leaders
 - Constitution
 - DUAA documents
 - Staff
- Activities
 - Scholarship programs
 - Social Responsibility
- Connect
 - ☐ My Account
 - ☐ Join Alumni
- News
- Notice
- Events
- DUAA Scholarship
- Download
- Contact Us

Limitations:

Though this site containing too man information about Alumni, we find some flows and limitation those are as follows,

- Do not have specific search options for alumni students.
- There is no career supports information in this website.
- There is no member registration for this association.

2.1.2 UIU Alumni Association

United International University (UIU) is one of the reputed private university of Bangladesh. The vision of the university is to become the center of excellence in teaching, learning and research around the country and the mission of UIU is to create excellent human resources with intellectual, creative, technical, moral and practical skills to serve community, industry and region. We do it by developing compact, interactive, related and caring relationships among teachers, students, guardians and employers in one word between all. The UIU also has alumni association which also provide several facilities, events and convocation information to the alumni students.

Key Features:

This system has many useful features and information those are such below:

- Convocation Guideline
- Alumni Registration
- Alumni Directory
 - Search
 - Student ID
 - Name
 - Email
 - Job Status
- Vision
- Contact

Limitations:

Though this has too many information about alumni, we find some limitations those are as follows,

- There is no specific information about Alumni, events & programs and organization in their website.
- This system doesn't have news portal in their website.
- Do not have job information and career supports.
- Vision feature could be improved entirely for their website management.
- Search option is not notorious.

2.1.3 BUET Alumni Association

Bangladesh University of Engineering and Technology, commonly known as BUET, is a public university in Bangladesh, which focuses on the study of engineering and architecture. They have prosperous alumni association which is to create a purposeful and forward-looking organization for the alumni of BUET for their social, cultural, and professional pursuits; for fostering greater cohesion and fellowship among themselves; for rendering all possible support to the transformation of the beloved mater into an institution of higher learning in technical and science education that is among the best in the world and for contributing to accelerated and sustainable national development.

Key Features:

This site has many useful features and information. Some of the key features are as follows -

- ❖ About Us
- ❖ Constitution
- ❖ Organization and management
- ❖ Newsletter
- ❖ Be Involved
- ❖ Program and events
- ❖ News and updates
- ❖ Members
- ❖ Membership application
- ❖ Gallery
- ❖ Souvenirs
- ❖ Contact Us
- ❖ Grand Registration

Limitations:

Though this site is full of information, we find some flows and limitations those are as follows,

- Do not have specific alumni directory where anyone/student can see alumni information.
- There is no link or feature career supports or job information.
- There is no advance search option.

2.1.4 SUST Alumni Association

Shahjalal University of Science and Technology also known as SUST is a state supported, public research university located in Sylhet, Bangladesh. It is the 8th oldest university in Bangladesh and the first university to adopt American credit system in the country.

Key Features:

This website also contains some excellent features and information. Some of the key features are as follows –

- Community
 - Classes, Groups & Clubs
- Activities
 - Reunions
 - Events
 - Where I Live
 - Travel/Study
 - On campus
- Resources
 - Alumni career services
 - Alumni email & directory
 - Membership
 - Your alumni center
 - Alumni center event planning
- News and Views
 - Magazine
 - Learn
 - Subscriptions
 - Stanford Links
- Volunteering
 - Recognition
 - Leadership
 - Beyond the club
- Search

Limitations:

Though there have lot of information about alumni which cover every possible features then we expected, we find very little flows and limitations those are as follows,

- It provides career supports, but there is no job information in this site
- There are no student achievements in this site.

2.1.5 University of Cambridge Alumni

The University of Cambridge (informally Cambridge University) is a collegiate public research university in Cambridge, England. Founded in 1209 and granted a royal charter by King Henry III in 1231, Cambridge is the second-oldest university in the English-speaking world and the world's fourth-oldest surviving university.

UNIVERSITY OF
CAMBRIDGE

Key Features:

This great university also arranges alumni association for their various purpose. So, let's check out their key features-

- News
- Events
- Get Involved
- Benefits
- Shop
- Travel
- Magazine
- Sport
- Contact
- Search

Limitations:

Al though this system contains too many information but there are few Limitation.

- There are no clear concepts about alumni directory in this site.
- Do not have any job information in this site.

2.2 Functional Requirements

We studied some existing system as we told before and find out some interesting, optimized and useful feature which are very notorious and helpful for alumni as well as for student. Sooth to say every alumni management is similar in the case of core features but they are different in non-functional requirement. We try to meet some new nonfunctional one's. Let's discuss about our project features.

2.2.1 Key Features

- ✓ **Personal account**

Anyone can create their very own personal account this is their personal profile.

- ✓ **Search**

- Name
- Mobile No
- Email
- Id

First of all, alumni or student can be identifying by their name. People can find out them by searching their phone number or by using their email or by current id. they can identify by their email too.

- ✓ **Alumni Directory**

User can find one alumni or students by selecting their Program Name, user Name, Mobile No, Email, CDIP or UIU id.

- ✓ **Job Portal**

In job portal there are two portion first one is view job and second one is posting a job. Both alumni and student can view job but need to be registered and have their very one profile. Profile need to be verified by admin. There should be both part time and full time both kind of various job post. As a form of image pdf file or as link extract from other sites. Job are posted by Admin as well as from Alumni or Job provider. But only those job that are verified by admin this are only showing on the sites.

✓ **Dynamic CV Format**

A dynamic CV will be generated for both student as well as for alumni after registration process using those data we are getting during the registration process. registration is little much lingering because of we are planning to create a CV that covered market need. CV will be containing all that information that are highly need for the job provider to recruit someone.

✓ **Dynamic Segmentation**

It's actually a nonfunctional requirement that based on the grouping section of experience and expertise. It's an extended version of searching process .to make search process easy and faster. In segmentation one can search by using particular field for Example. One need to hair some PHP developer he just needs to write down PHP in the search field under segmentation as a result resume of the people who have given PHP in their expertise will be showing in front of him in a directory. He can also select people under their experience. We can select beginner, low level or expert level .in segment searching we can also find people by their working time too.

✓ **Segmented Mailing**

This is based on the skillset. It's a mailing system that will be send by the admin to some group of peoples.

There is some extra information which is also connected to our website. These are:

- CDIP Courses- Offered Courses from CDIP, UIU
- Meet our Instructor- CDIP Course Instructor
- Meet our Management- CDIP Director, Chief Adviser, Adviser and Instructors
- Various event in university
- If some new course added in the university syllabus.

2.2.2 Development Model

The Agile Method is a particular approach to project management that is utilized in software development. This method assists teams in responding to the unpredictability of constructing software. It uses incremental, iterative work sequences that are commonly known as sprints.

Figure 2.1: Agile Methodology

2.2.3 Non-Functional Requirements

We identify some Non-Functional requirements that can help with wonderful user-experience. Our Non-Functional requirements are as follows –

- Register
- Login
 - Using Local account
 - Using Social site account
- Search with auto suggestions
- Performance smooth and fast
- All Alumni properties are individually search able and sort-able.

2.2.4 Benchmark System vs Our Proposed System

Features Name	UIU Alumni	DU Alumni	BUET Alumni	SUST Alumni	Cambridge Alumni	Our Proposed Alumni
Member Registration	✓	✗	✓	✓	✓	✓
Alumni Directory	✓	✗	✗	✓	✓	✓
Dynamic CV format	✗	✗	✗	✗	✗	✓
News	✗	✓	✓	✓	✓	✓
Job Portal	✗	✗	✗	✗	✗	✓
Search	✓	✓	✓	✓	✓	✓
Segmented mailing	✓	✓	✓	✓	✓	✓
Segmentation	✗	✗	✗	✗	✗	✓

Figure 2.2: Benchmark system vs Our proposed system

In this figure [Figure 2.2] we are comparing our proposed system's main features with benchmark products.

Chapter 3

System Design and Development

3.1 Use Case

Making a bridge between requirement and system is the key task of use case diagram and point to understanding the functional requirement. A use case utilizes a character element, which can be created using the use case all modules. There is some use case module of our system.

3.1.1 Website Main Modules

Figure 3.1: Use Case of Main Modules

[Figure 3.1] In this use case we are showing our system main modules. This use case carries a brief idea about our system. Basically, in this system has six main modules. Those modules are sign up, log in, Alumni directory, Search Option, Job post and Site Control like approve or delete various edit or member registration this is also another module.

3.1.2 Job Portal Module

Figure 3.2: Use Case of Job Portal Module

[Figure 3.2] In this use case we are going to discuss about our job portal. In job portal there are six modules like Create job post, show job Dynamic search, Filter and Segmentation Approve Posts and finally Delete post.

3.1.3 Site Control

Figure 3.3: Use Case of Site Control

Finally, this is our last use case module. [Figure 3.3] In this use case we are showing our system site control module and its functionality. This module has some basic functionalities like update account information, approve student of alumni profile account, approve job and various post like success stories or job and finally remove account and Post.

3.2 Entity Relationship Diagram

Figure 3.4: Entity Relationship Diagram (ERD)

In this Figure [3.14] we are showing our Entity Relationship Diagram. This diagram showing us our system basic database entity and its relationship between those entities.

3.3 Entity Relationship Schema Diagram (ERD)

Figure 3.5: Entity Relationship Schema Diagram (ERD)

3.4 Activity Diagram

Figure 3.6: Activity Diagram

In this figure [Figure 3.6] we are showing our system's activity diagram. This diagram is mainly a flow chart to represent the activity to another other. The activity can be labeled as an operation of the system.

3.5 Data Flow Diagram

Here we are going to discuss up to level 3 to understand the process.

3.5.1 Level 1 Diagram

Figure 3.7: Level 1 DFD

In this figure [Figure 3.7] we are described our level 1 diagram with all main processes, those are Alumni Directory, Job Information and Admin.

3.5.2 Level 2 Diagram

Figure 3.8: Level 2 DFD

In this figure [Figure 3.8] we are described our level 2 diagram have two main processes with a database entity. Those main processes are Alumni Information, details.

3.5.3 Level 3 Diagram

Figure 3.9: Level 3 DFD

In this figure [Figure 3.9] we are described our level 3 diagram have only one Job Details process with one database entity.

3.6 Context Diagram

Figure 3.10: Context Diagram

3.7 Sequence Diagram:

A sequence diagram is a relations diagram that shows how stuffs operate with one another and in what order.

3.7.1 Sequence Diagram for Alumni

➤ Sequence Diagram for Alumni:

Figure 3.11: Sequence Diagram for Alumni

3.7.2 Sequence Diagram for Admin

➤ Sequence Diagram for Admin:

Figure 3.12: Sequence Diagram for Admin

3.8 Deployment Diagram:

Figure 3.13: Deployment Diagram

3.9 Implementation Environment

To implement the project, we use Laravel Framework. It is a free, open-source PHP web framework.

We use HTML, CSS, Bootstrap4 and JavaScript for front end. As a tools Microsoft SQL Server XAMPP and Microsoft Project is being used by us. For database we use Microsoft SQL server it's a relational database. For version control system we use GIT and for Dependency Management we use Composer. Those are given in a listed form below,

- **Framework**
 - ✓ Laravel
- **Language**
 - ✓ HTML, CSS, Bootstrap4
 - ✓ JavaScript
- **Database**
 - ✓ We Used Microsoft SQL Server 2012. This is relational Database.
- **Tools**
 - ✓ Microsoft SQL Server Management Studio 2012
 - ✓ Microsoft Project
 - ✓ XAMPP
- **Version Control System**
 - ✓ GIT
- **Dependency Management System**
 - ✓ Composer

3.10 User Interface

3.10.1 Home Page

Figure 3.14: Home Page of CDIP-CSE Alumni Management

This is our system's home page. Initially users can find lots of activity options using Alumni Directory option. User can also find popular job circular which was posted in this website.

3.10.2 Registration Process

Here need to select the current status for example alumni or student.

The registration form is displayed on a green header bar with the text "CDIP-CSE Alumni Association" and links for "About" and "Login". The form itself is a light gray box titled "YOUR STATUS" with radio buttons for "Alumni" (selected) and "Trainee". Below this, there are input fields for "Name" (with placeholder "enter your name"), "Email", "Password", "CDIP ID", and "UIU ID(optional)". A green button labeled "Next -> Personal Information" is at the bottom of the form. The footer is a green bar with "All rights reserved to CDIP" and a "Back to top" link.

Objective	Present Salary	Expected Salary	Looking For	Available For
As a professional with years of experience under your belt, you are probably writing a resume in order to move to a better working environment, transfer jobs, earn more money, or attain a managerial role. Your Career Objective will need to reflect your wishes, and make a strong argument for why you'd be a strong candidate.	200000	400000	expert	contract

Chapter 4

Conclusion

4.1 Summary

Throughout our project design and development epoch, we have conducted to submit and to develop a web application system. The main goal of our project was to deliver CDIP-CSE alumni information to all users those who require it most. In our project proposed system, there mostly two types of users which is, general users or alumni and admin of CDIP-CSE Alumni Management. In this system, alumni act an important job as the resource of this association who are working in various IT company.

So, our goal is done successfully with this project. We have learned new things like working with real life project throughout our project period. Hope it will help us for our future career. We have faith that our participation here as web application developer will not only improve our career but also will enlarge our ability to make forward thinking everywhere.

4.2 Future Work

Due to the time limitations, we were not able to encounter the whole development process for this project. Some future work of project are as follows,

- Make a super admin panel.
- Make search option more notorious.
- Make a profile system for job provider.
- Create a notification option.
- Make a chatting system between users.
- Create a mobile application.
- Make system more dynamic.
- Make segmentation-based search control more dynamic.
