Dhaka-1209, Bangladesh.

ACKNOWLEDGEMENT

In the name of Almighty Allah I started to write this project I am blessed a lot today to get my final destination of my writing with the divine help of almighty Allah. I am expressing my gratitude from the bottom of my heart to my lord and thanks for making everything possible to make a successful conclusion of my project.

I am grateful to my pioneer the honorable professor Dr. Nurul Huda, the beacon of the Department of computer science and engineering of United International University, Dhaka. Honorable coordinator of MSCSE of UIU today I am going to touch the final line of my project the path of this project was not so easy to me, it is you whose wisdom, knowledge, innovative supervision has given me the confidence to pave my ability, you have dispelled all of my week point of my study, you did it painstakingly and your endless patience and constructive direction has shown me the way to finish my project successfully.

Finally I am blessed to get a duly qualified team of MSCSE of UIU whose endeavor and kind cooperation has shown me the right direction to fulfill the requirement of my project.

ABSTRACT

E-ZINE is an innovative creation in women's electronic magazine world. There are many electronic papers and magazine in Bangladesh but none of them are not being able to satisfy the user. E-Zine is published with desire context of the user without any delay. It is the dream world of women's desire .it gives emphasis on women's expectation, that's why it's all time published with lucrative feature what influence the women to lead their life with perfection. The world is very small now. We are the citizen of global village. Every day we are being introduced with new concept of life style. Here in Bangladesh E-ZINE is playing the vital role to convey the changes of life style of women's life. Women's always like to lead colorful life with happiness. Sound health is the first condition of happy life, E-ZINE is that magazine what focus on women's health care first, it takes care about adolescent, pregnant woman and elderly women's health with great care then beautifications what women's like most not only these it influences about women's better career, sports, healthy food practice, child care, cultural activities, practice of religion to build a happy family to get a better society as well. It is the great option to express the user latent ability by writing their own articles and opinions what makes the E-Zine more colorful. It applies very simple access mechanism to enjoy the magazine with updated news and views of the user from any part of the world. To introduce the business or the products, E-ZINE'S commercial site plays a vital role as well.

TABLE OF CONTENTS

CONTENTS	PAGE

CHAPTER 1

INTRODUCTION

1.1 Introduction

Bangladesh has developed a lot of its digital world, that's why electronic media here in Bangladesh playing a vital role. There are many E-portal in Bangladesh on various topics but none of them are focusing on women's issue properly.

O Now a days to get updated news and information peoples depend on electronic media, it has opens up opportunity for all in all around the world. They are using World Wide Web side to maintain better communication that's why Electronic magazines and newspapers has been very popular by the last decade.

O Advantages of E-Magazines are much better than conventional printed magazines. In the E-Magazine user gets news and articles on time without any delay. Easy access and rapid updates of the news has added extra attraction to the users, to get the benefits of E-Magazine user can get access from any part of the world in any time.

O Suitable searching mechanisms are one of the best feature of E-Magazine. Individual collections and articles are provided in E-Magazine by giving value of the customer's interest.

1.2 Objective

O The objective of my project is to give a proper structure of an electronic magazine what will help to deliver a precise E-Magazine for the women with their desire context .It is the source of explore possibilities where the user can create their own articles and also can exploit offer from the world wide web with a flexible mechanisms.

1.3 Motivation

Since E-Zine is a E-Magazine for women that's why this Magazine has designed with desire feature what will fulfill their expectation, this magazine is not only contain third parties written context but also it provides opportunity for the users to express their views and opinions. The motto of this E-Zine is "Readers are the writer "it's not only influenced the women to read the magazine but also motivated the women to prove their creativity by promoting their latent ability. It has created that window where the women can see and show their beauty of mind. E-ZINE the eye of women mind.

1.4 Layout

The women's e-zine application has two modules. Admin panel and website. In Admin panel user can entry all the needed information for the website and in the website user can find all the interesting stories/article on basis of the choice.

CHAPTER 2

LITERATURE OVERVIEW

2.1 Commence of System

This system is comprised with two section. These are –

1) Backend (Admin panel/content management section)

2) Frontend (User interfaces or magazine)

In Admin panel user can entry all the needed information for the website. I categorized in some sections such as :

- Basic Information about MANOBI e-zine
- About the magazine.
- Dynamically menu creation for the site.
- Menu content section to entry the details about the content.
- Advertisement section (for earning money)
- Terms & condition.
- Gallery section.
- Comments & sharing in social media.
- Writing section for interested writer in the magazine.
- Subscription & tag cloud friendly.
- Slider creation for homepage.
- Editor's choice, top viewed news etc easily manageable from the backend.
- Login & user creation for maintain the website.

In frontend or website where user can find all the interesting stories /article on basis of the choice. I categorized in some sections such as:

- In Homepage there is three top bars, in the first bar there is a search option where user can search easily what the want to read or find.

- In archive section user can find any of the published news according to year or published number.

- In menu bar viewer will find specific name of reading interest which is most user friendly of reading interest. As it is targeted for Bengali women readers all the news will published in Bengali, homepage is designed & organized according to present published articles.

- In homepage basically viewer will find the summary of the article when they click they will redirect to details articles. This page is designed with image and related articles overview and tag options.

- Viewers will give comment & share in social media the article if they wish to.

- There is gallery section which will publish focused on a specific successful women at a present day.

2.2 Scope of E-Zine

E-Zine has designed based on the demand of Bangladeshi women. World is changing rapidly, this thirsty world is busy to meet its demand, it makes the people innovative, that's why they are being busy to invent life changing invention. These life changing events come in front of the people through the media, it could be print media or electronic media. E-Zine is the beacon of Bangladeshi women's electronic magazine. It conveys that innovative events every moment and it focus on life changing events every day. this magazine not only influence the women to read the magazine, its motivated them to involve with the magazine to express their opinion as well , Now a days women are very careful about everything , they want to get everything in one touch , E-Zine is that window where they can see whatever they want or whatever they want to read or write about a perfect woman's life , this magazine contains various section what helps to portrait the beauty of woman's life not only this, the mechanism what has applied to get this electronic magazine is very simple and easy with top level security what ensure the safety of the user with the highest satisfaction. Log in section, writing section, gallery section, comments section, editorial section has given extra dimension of this magazine, and other interesting part of this magazine is commercial section what is really lucrative for any party from where they can earn money from advertisement, E-Zine is not one party property it maintains both parties interest.

CHAPTER 3

REQUIREMENT SPECIFICATION

3.1 Functional Requirements

The function of E-zine is internet based and focused on women from all sectors. Now a days internet is so popular and printed copy of papers is just wasted thing so online based any portal so user friendly that's why the idea of woman online magazine came. Though functional requirements is simple but implementing this was so tough. To maintain the e-zine dynamically I need a content management system from where I can easily update the content time to time. Some popular CMS like word press, joomla already dominating the market but those cms wouldn`t fulfil my requirements that's why I built a CMS from my own. I searched lot and studying on various online portals from all over the world and the minimal requirements I gained to build this e-zine. For the CMS some ideas came upon my mind –

1) Secured login system.
2) All contents management from the CMS for the website.
3) Mailing facilities.
4) User wise permission.
5) Archiving all contents.
6) Subscription and review permission etc.

For the website I just focused on user friendly and eye catchy layout. In this era of smart phones everyone use their phones to read the articles on phones or tablets. My e-zine technology based on mobile friendly layout. User friendly search mechanism and user taste based articles made it more functional.

CHAPTER 4

1. ANALYSIS & DESIGN

4.1 Use case diagram in admin panel

This follow chart depicts the scope of activities of E-ZINE. It is mainly explained the feedback process of a published article. Many parties are involved with the feedback of the article. These feedback comes from registered user and the admin. Without any consent of the admin nothing will be published in the magazine. Before submitting any article a registered user need to access in the system of the E-ZINE with the user ID to identify the authenticity of the user. It ensure the safety and security of the user. So that in this system there is no chance of an intruder to harm any of the user of E-ZINE. Not only this, admin has the right to reject anything if that does not satisfy the admin it could be a comment or an article. The policy of the admin is not only maintain the safety and security of user and the system but also the standard of the writing and the comments as well.
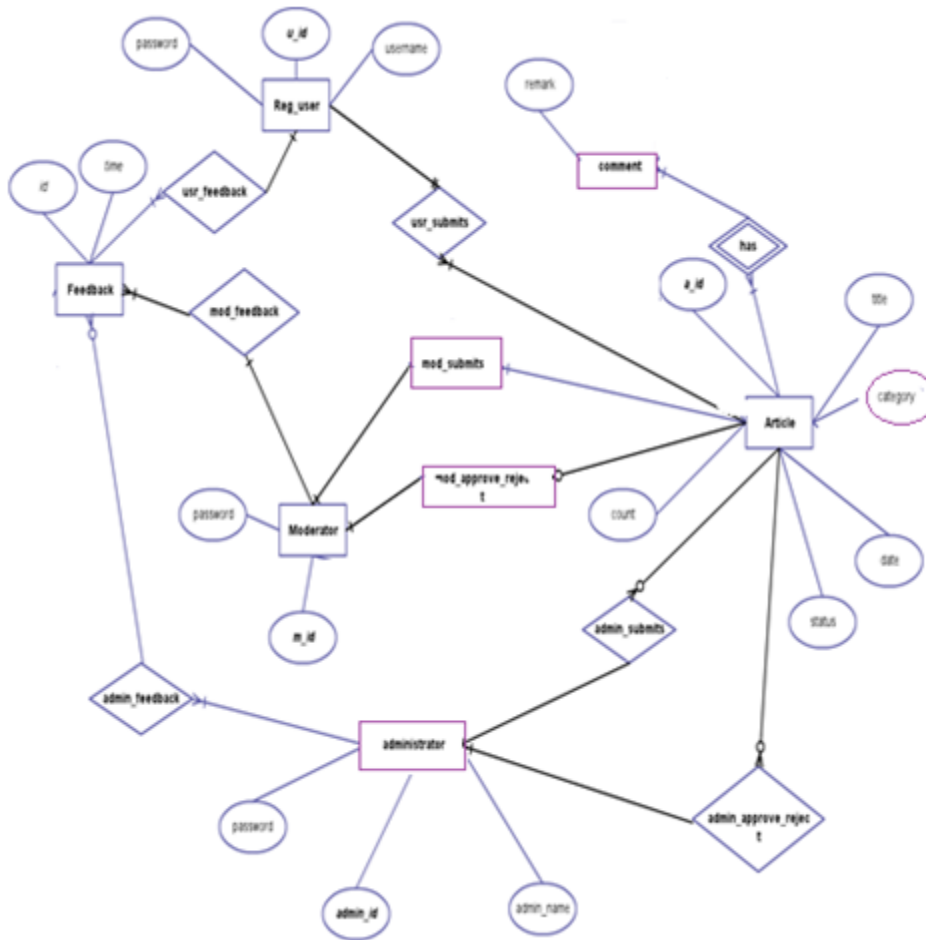

4.2 Admin Use Case Report

Admin use case report is stated the function of the admin clearly, it is very simple and easy to understand the admin's activity. Admins need to keep an eye on various activities what always keep them busy, it is explained how to maintain website security. data base create and backup, sever update and maintenance , design and analysis and reviews of activities .
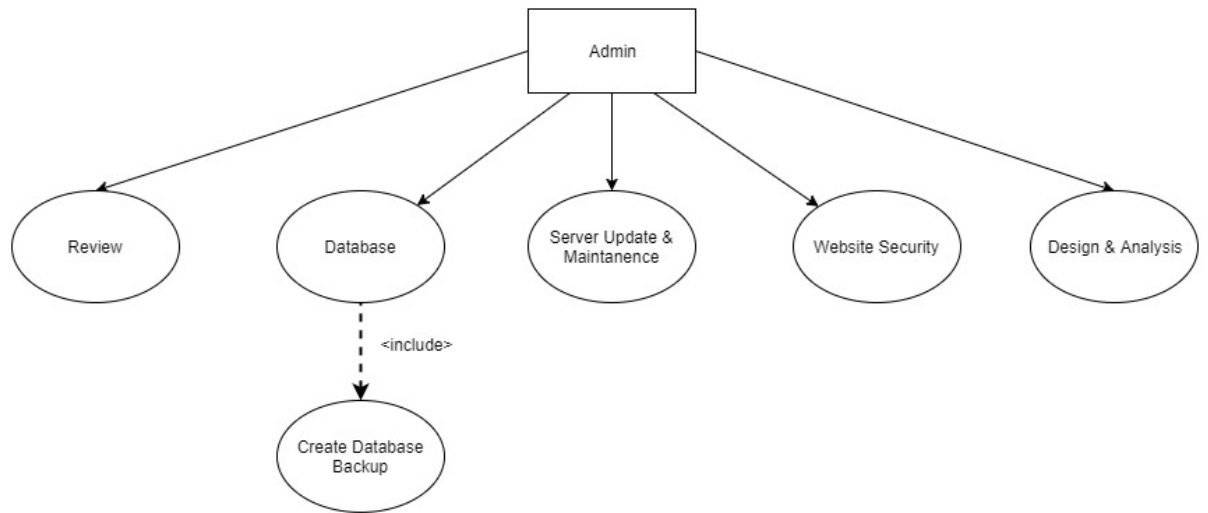

4.2.1 Registered users use case report

This is the prestigious section for the registered user from where they get extra honor to be a member of E-ZINE. This option has created ample opportunity for the user to express their self. A registered member needs to login to continue this section. This section contains many option for them to write on any article or for self-writing with their own profile. Even there is option for make comment on any article.
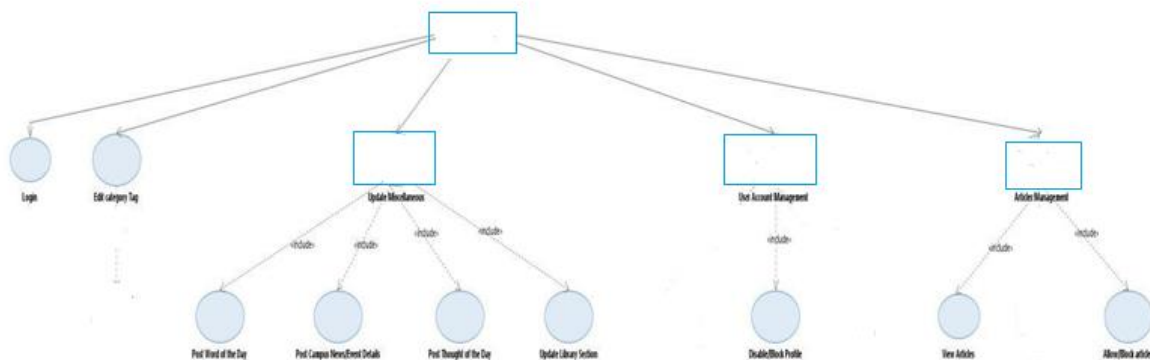

4.2.2 Moderator use case report

Moderator works on core function of the magazine. Articles are the main part of the magazine, publishing articles with right information is very essential otherwise it will lose its importance, to maintain this properly moderator works to edit articles, view and block articles as well. It helps to update accounts management in various ways, after that there are many activities what is required to update as well where everything is done by moderator.

Description:

The moderator forms the center of the entire scenario of the online magazine website. He has various functions to perform. The moderator posts the word of the day on the website, updates the news and events, posts thought of the day and update the library section. The moderator will also, confirm membership, and will have the privilege of disabling a profile and renewing the password if required. The moderator can block certain offensive articles of required. The final verdict of selecting the article or rejecting it lies with the moderator. Hence, The most important part of the use case model is the moderator.

4.3.1 User login Activity

This section clearly depict , how to login successfully , just need a verification after input the user name and password then user will successfully login , if anything goes wrong , such as user name , password or user forgot the password or user name then it can be solved easily as well after a simple security verification with the help of the admin .
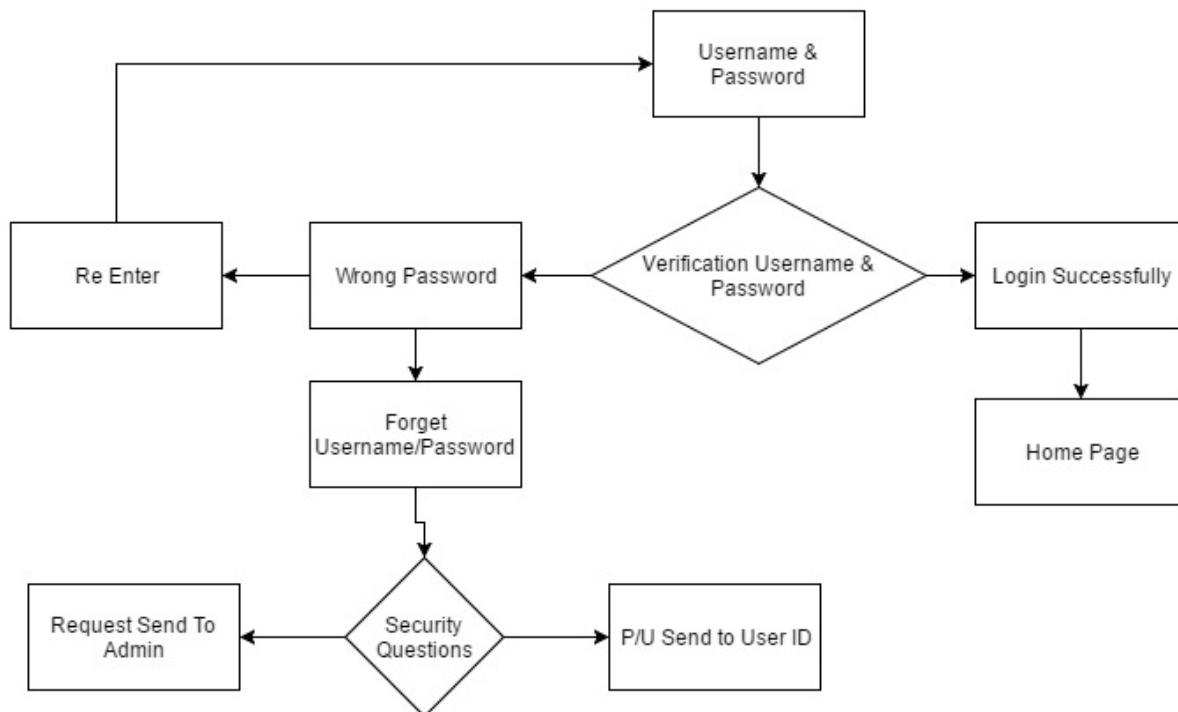

4.3.2 Managing Accounts Activity

For the user, managing accounts activity is very simple and easy, to change the password , to delete account or to edit details they can easily render here .
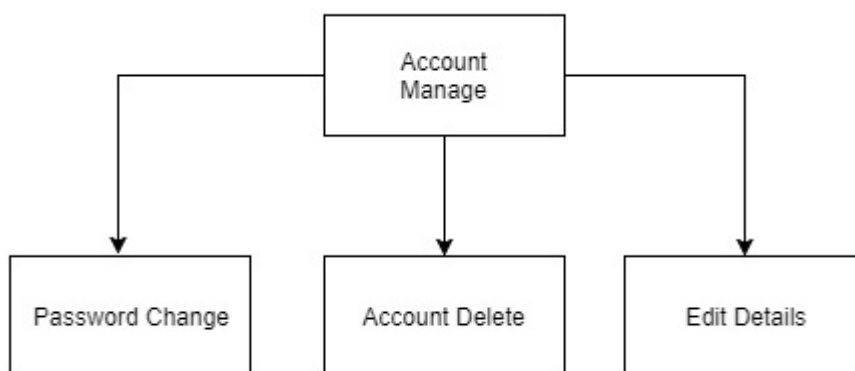

4.3.3 Rate and comment activity

This section is for guest user and registered user to make comment on published article for rating of articles. Guest user can't make comment for rating, registered user's comment is only counted for rating of articles.

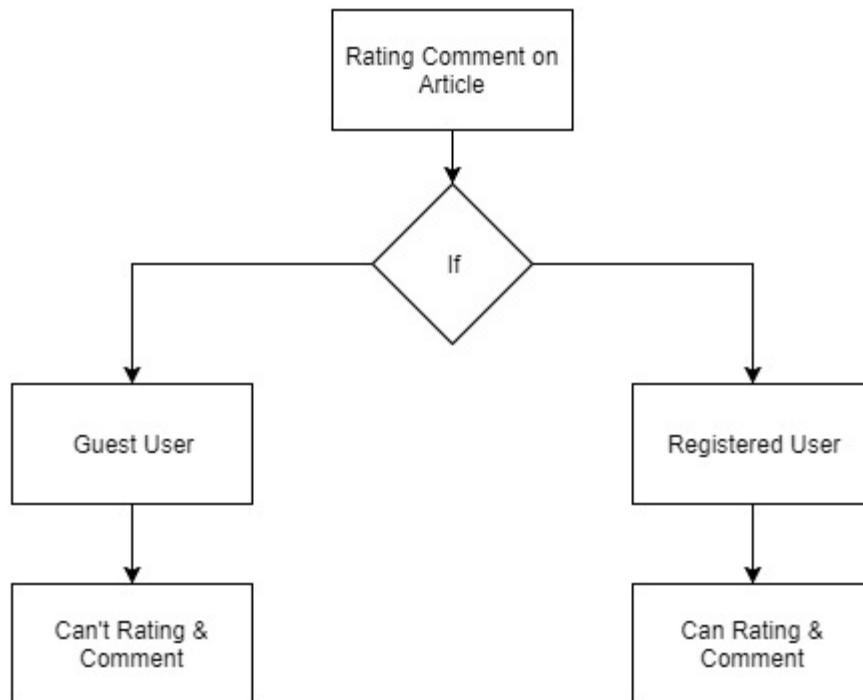

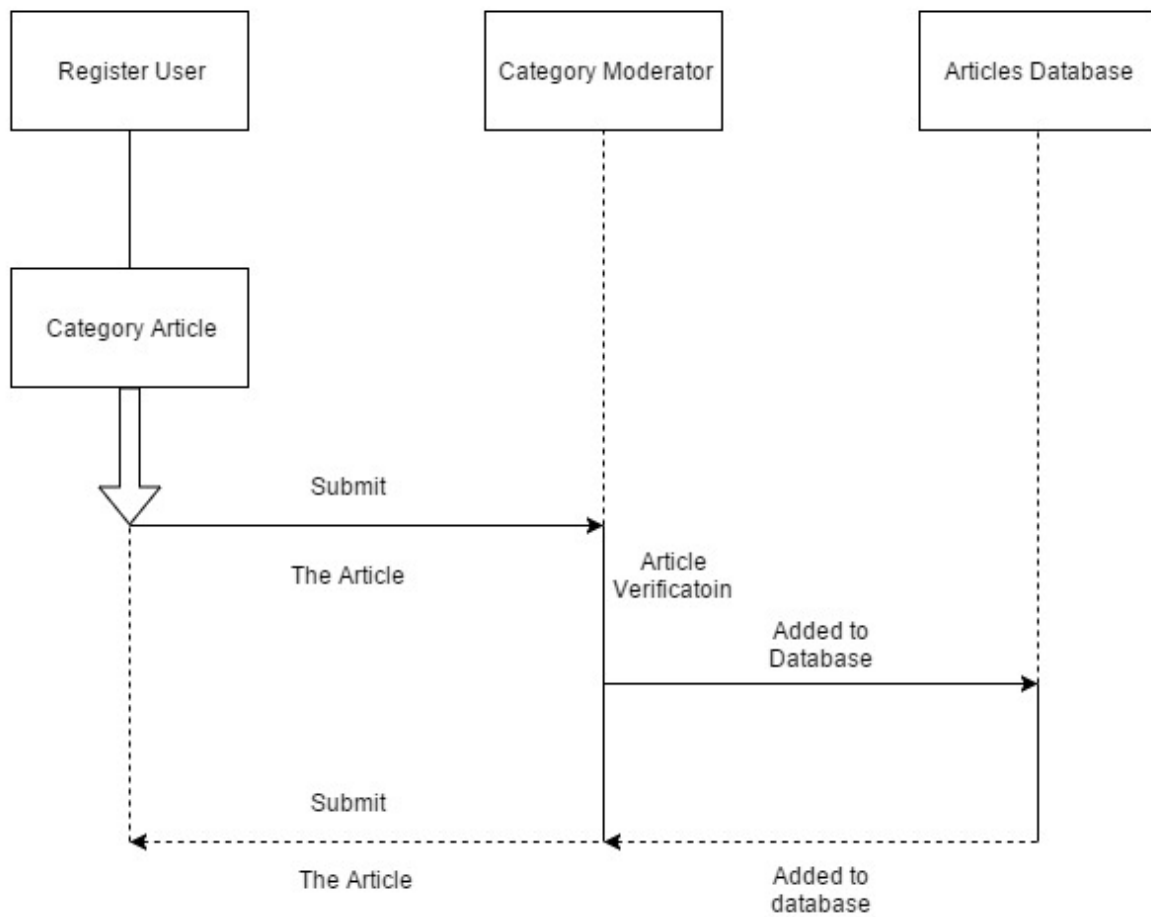

4.3.4 Report Comment Activity

In report comment activity section members need to send request to the admin to make a comment , it's depend on admins consent , it can be accepted or ignored but guest can't make any comment ,
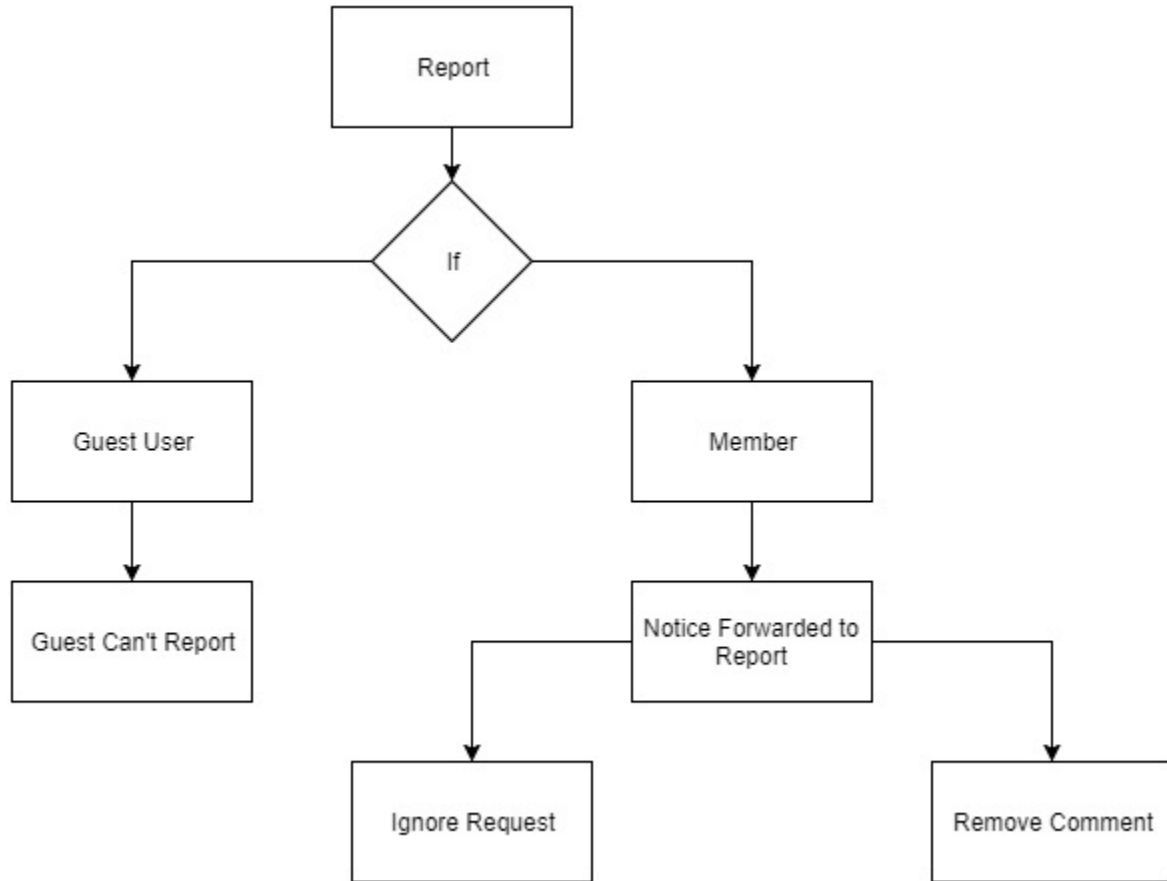

Description:

This section is for the registered user, it is that section from where a user can choose any article to read or write to submit, there is another option to article verification and to add to the database as well.

CHAPTER 5

IMPLEMENTATION AND TESTING

5.1 Implementation Overview:

To implement this system I have applied various techniques, language and software what helps to make my system user friendly, it is a faster, secure and highly reliable centralized web based system that's why E-ZINE has a brighter future to be a one of the best magazine in E-Magazine world.

5.1.1 Methodology

Adobe dream weaver: To run the system of E-zine Adobe Dream Weaver has applied.

XAMPP Server: This is the server what is needed to open first to run the system of E-zine.

Microsoft Office 2016: All kinds of written actives of E-Zine has been rendered by applying Microsoft Office 2016.

5.1.2 Technology

CSS3#: I have used CSS3 to make the software web based platform independent. It can also be used as offline desktop based.

PHP: I also use PHP.

SQL Server 2014: To make the application simple and light weighted, I have used SQL Server 2014 database.

JAVA Script: JAVA Script is a language for smart tab bar will help to open the page with a finger tap.

HTML5: HTML5 is a markup language used for structuring and presenting content on the World Wide Web. It is the fifth and current version of the HTML standard.

Bootstrap: Bootstrap, a sleek, intuitive, and powerful mobile first front-end framework for faster and easier web development.

J Query: j Query is a cross-platform JavaScript library designed to simplify the client-side scripting of HTML.

➢ **Structure principle**. E-Zine is a well Designed women's E-Magazine , principle of the structure of E-Zine is to exhibit the magazine in front of the customer with clean and clear view , so that an user can get attraction at a glance .

➢ **Simplicity principle**. This magazine contains Very simple and easy access technology what has given extra dimension to the user in terms of reading and writing of context and to open other pages as well.

➢ **Feedback principle**. This E-Magazine contains published material, that's why expecting feedback from the user is a common incident; E-Zine has given entitled to its user to write their feedback for any context of the magazine.

5.2 Software Testing

Software testing is rendered to satisfy the stakeholder by providing information of product's quality and service, it is conducted under an investigation with the objective of to understand the implementation risk of the software for the business.

To verify or to validate the product, application and the software program this test is applied,

1. Required development is rendered according to the guided design.
2. Desire working efficiency.
3. Same features remain after implementation.
4. Meet the stakeholder's requirement according to its satisfaction.

Software testing, in the development stage this test can be apply at any time but depends on the testing method , after determining the requirements and completing the coding process most of the software test action is rendered ..This is a continuous process in agile approach.   A selected software is used to render the methodology of the test.

Techniques used in white-box testing included:

• Application programming interface
• Creating tests to satisfy some criteria of code coverage

- Fault injection methods - intentionally introducing faults to gauge the efficacy of testing strategies
- Mutation testing methods
- Static testing methods

A test suit, including black box testing, created from any method is evaluated by Code coverage tools. To explore the systems rarely tested parts for the software team this test is related.   Code coverage as a software metric is reported in percentage for:

- *Function coverage*, which reports on functions executed
- *Statement coverage*, which reports on the number of lines executed to complete the test

Statement coverage, it ensures executed branches and code paths with correct functionality .this is May not sufficient if the same code does not precede same input.

Black-box testing Black-box testing it is a method of testing with a software , as such it's a software where tester does not need any internal implementation knowledge to examine the function. To render this test tester no need to know the mode of function of the software just need to know what supposed to do with the software. Various tests are involved in black box testing method, such as fuzz testing , equivalence partitioning, boundary value analysis, all-pairs testing, state transition tables, decision table test model-based testing, use case testing, exploratory testing and specification-based testing.

Grey-box testing:

Grey-box testing is rendered at black box level or user level .before rendering this testing system need to design the test, proper knowledge of algorithm and internal data structure leads to execute this test. A partial access of software's source code is needed for the tester. Due to system under test input data and out data will remain outside of the black box that's why manipulating input data and formation of output data are not treated as grey box . The output of this test is this distinct difference is applied to

integrate two different modules of code written by two different developers as to expose the interfaces to test only, gray box is treated as a store of modifying data , due to system under test users are not able to change the data outside normally .

Visual testing:

Visual testing has designed to work on software failure. By applying this testing system a developer can easily detect required information to examine the incident of software failure, data presenting of visual test express the information clearly.to render this test need to record everything in video format .microphones for audio , webcam is used to input the picture in a picture as a part of this test . Functional accuracy test, visual test of all screen is needed to render to confirm about the accuracy of the module of the application what ensure that process is working properly.

CHAPTER 6

SCREEN SHOTS

Login Form

User and admin have to login to access the system. The system needs user name and password which is mandatory and also can give company name which is not mandatory that given below.
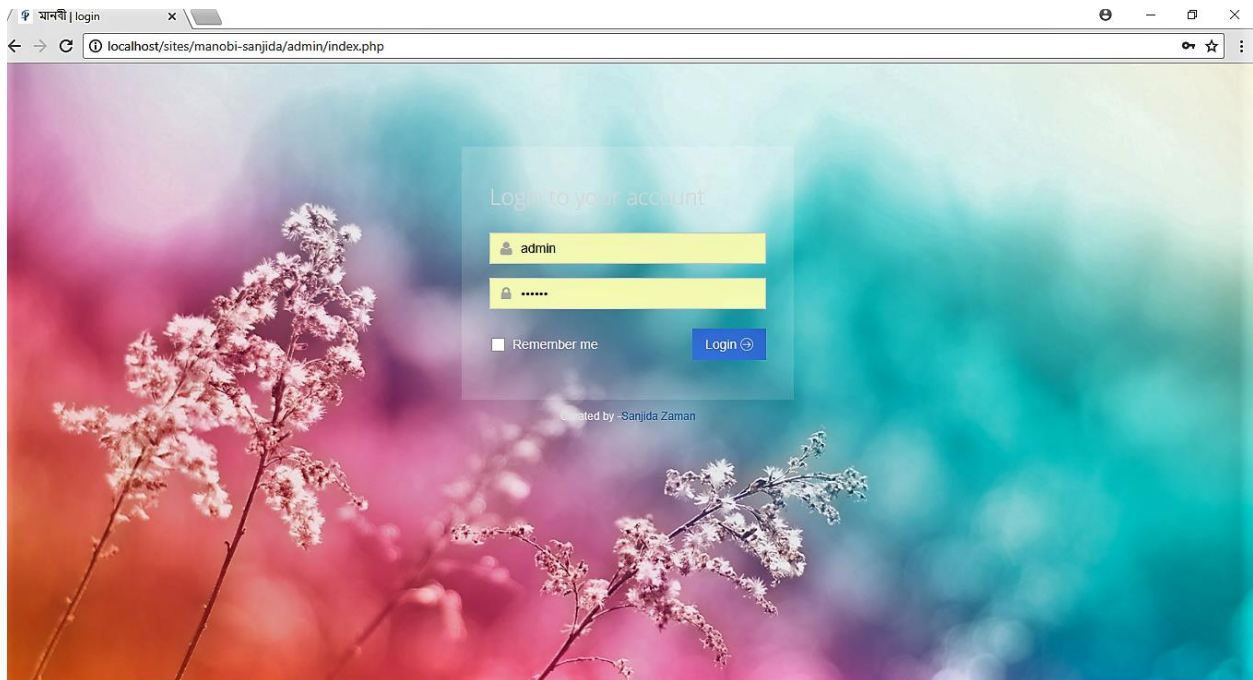

COMPANY DETAILS

E-ZINE is an independent online magazine .It was founded in 2017. The founder of E-ZINE is shanjida sharmin. Headquarters 1/604, 1215, Dhaka. Service area, worldwide. Key person (CEO) is Sanjida sharmin . E-ZINE is a web portal and online magazine service. Sanjida sharmin is the owner of E-ZINE, expected number of employee 2000.Web site is WWW.EZINE.COM.

About Company;

E-ZINE is an online magazine. It provides the news to millions of women in all around the world. It was established in 2017. The motto of E-ZINE is 'awareness is the light of life'. To dispel the darkness of

women's life is the main objective of E-ZINE. Content and memberships are the main parts of the service of the magazine. In the E-ZINE advertising are treated as a both parties money earnings product. E-ZINE is not only influence the women to get a better life but it also provides training to the women about the better health as a part of its corporate social responsibility. E-ZINE is not staying beyond the criticism. It always welcomes any kind of constructive criticism for the good shake of the future of the magazine. To get much better idea about the magazine E-ZINE has introduced its own page in the magazine it's known as 'ABOUT US '. From this option any party can get any information about the magazine in any time from any part of the world. .

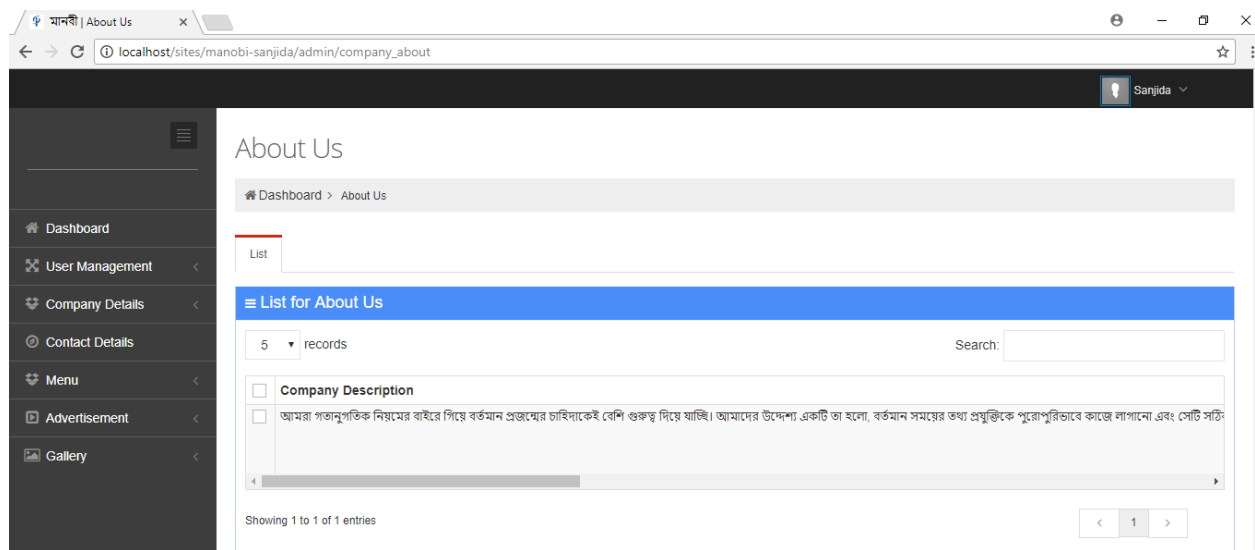

Users Opinions Value

This magazine influences the users to express their latent ability in their own articles and by considering the importance of the writings that can be published in any edition of the magazine.

Entitle and exemption   Media reflects the scenario of a nation's activities. It may have effect in the society, it could be positive effect or negative effect. Positive effect what people always expects but negative effect may create unrest in the society. This dilemma may put the authority of the media in a danger. To get red from this problem, print or electronic media has to run their business according to some rules and regulation what gives the safety and security of the media and the authority as well. In terms of this roles E-ZINE gets some exemption and entitled as well. In the E-ZINE, users are entitled to write their own opinions but authorities will not take the liabilities of the negative effect of the writings likewise E-ZINE gets the right not to allow to publish their news in any other magazine or any electronic or print media not only these E-ZINE will not take any liabilities of any negative impact of the published news expect editorial because that will be treated as the writers own opinions.
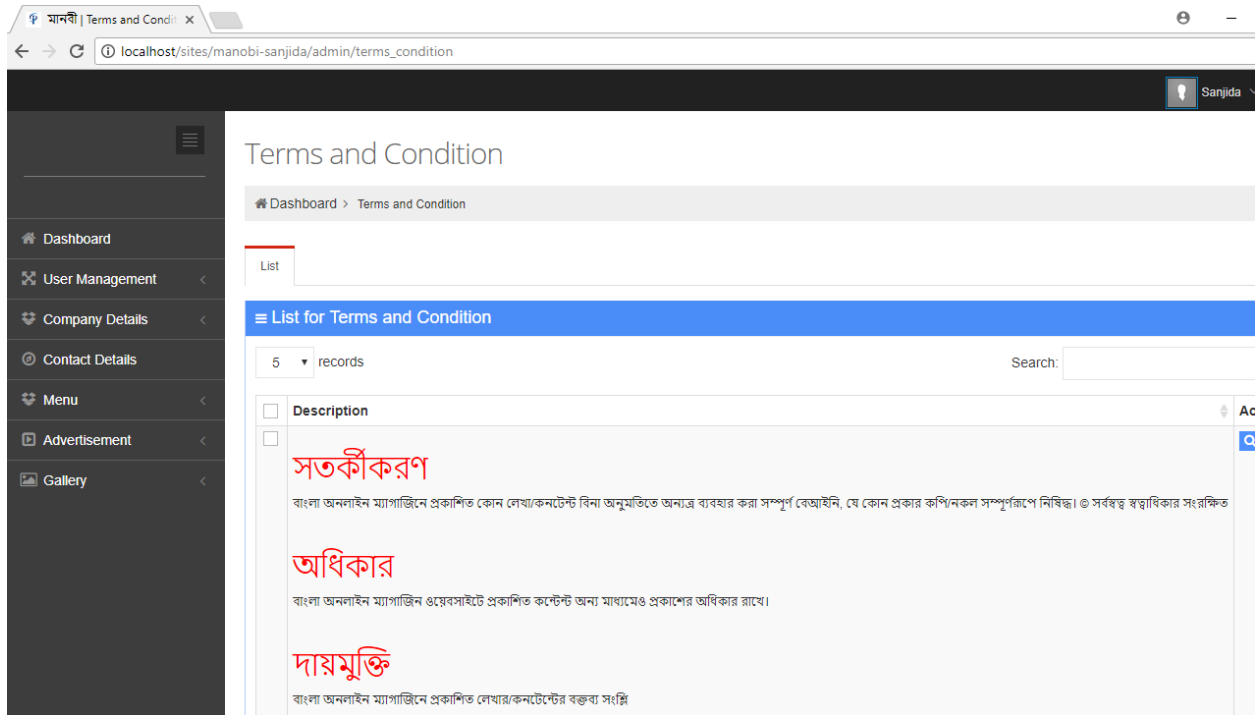

Communication and identification

E-Zine is a user friendly electronic magazine. A user can easily make contact with E-Zine after entering in contact details page of the magazine, these page contain all contact material of the magazine.
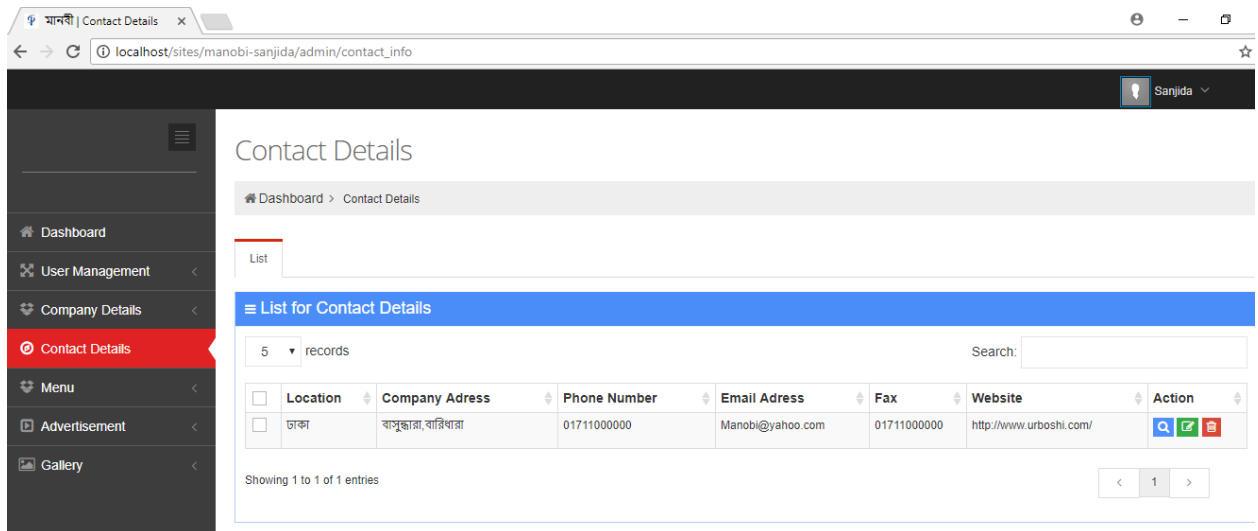

Menu Creation For Contents

This page is used to create menu for the contents. Menu is created to arrange everything according to order, menu content depicts the content of the context. In this window user can search their expected

elements. Menu contains names, it comes with category, it could be main or sub category, and it follows the order of number as well.

Contents For the dynamic Menus

 Dynamic menu has added an extra dimension of this electronic magazine. Sometimes user may miss an important news, but E-ZINE always keep it in mind that user may need that news in future by thinking this point this dynamic menu has been created.   This menu contain various function of the content. But these functions are very simple and easy by using this user friendly functions from this menu a user can easily find out any type of news what was previously published in this magazine. To get that news user need to follow some directions of the menu form. To follow this form user no need to be worried, this menu form depicts the system in a clear and simple way. What helps the user to get their desire news of the E-ZINE It is already explained in the menu content after that I am giving a clear explanation how to get the previous news of E-ZINE by flowing the form of the menu content. When a user will go to search for a previous news of E-ZINE first of all a user need to select the published year it could be any year and then the number of the magazine, after getting the published magazine then need to select the menu

form of the menu then a user will easily find out the title and the elaborate news as well what she was expected from the magazine.

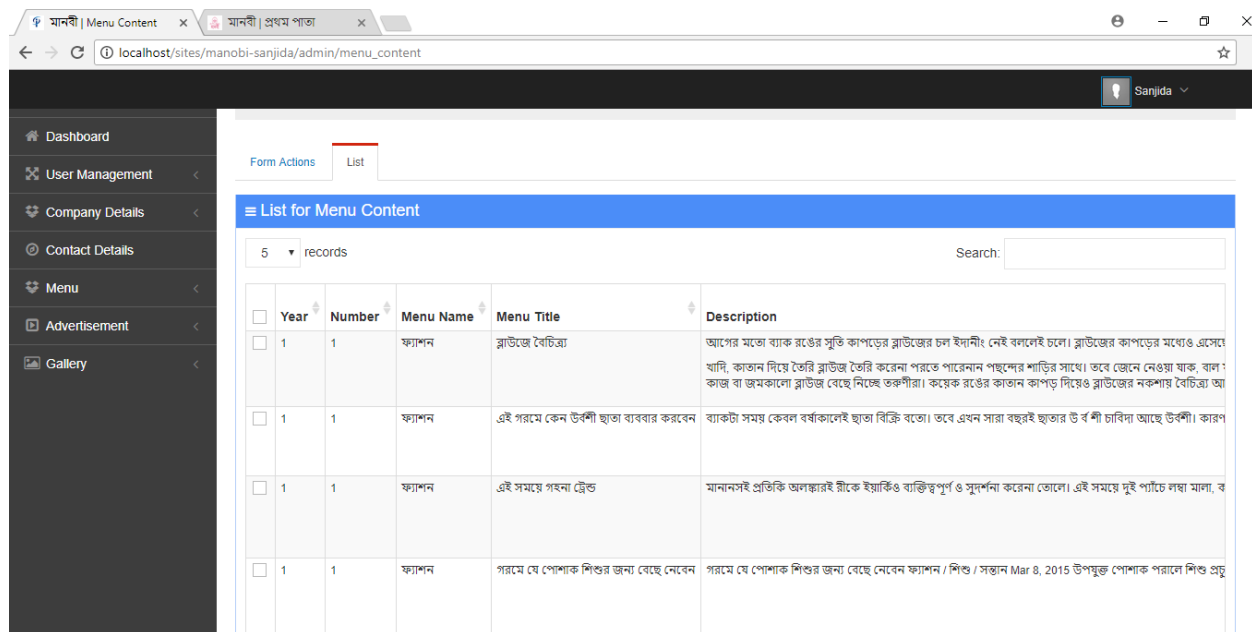

Editable Menus: The activities of E-ZINE is a continuous process. It contains various context and it comes continuously depending on the time, place and the culture of the people. E-ZINE does not convey the conventional news , it is always carry the life changing events for the women that's why change is needed in any section of magazine in any time , not only the change of events ,even need to modification and editing as well . Editing menu helps to perform these sort of

Activities properly. It is rendered from the main menu and sub menu as well. Main menu contain various topics, such as life style, fashion, beauty tips, career, cooking news of this sort of activities are always volatile. It keeps the admin always busy to edit the news. The option of editable menu keeps the E-ZINE alive .These page offer the option to change in main menu. Admin can does it according to their requirement in any time.
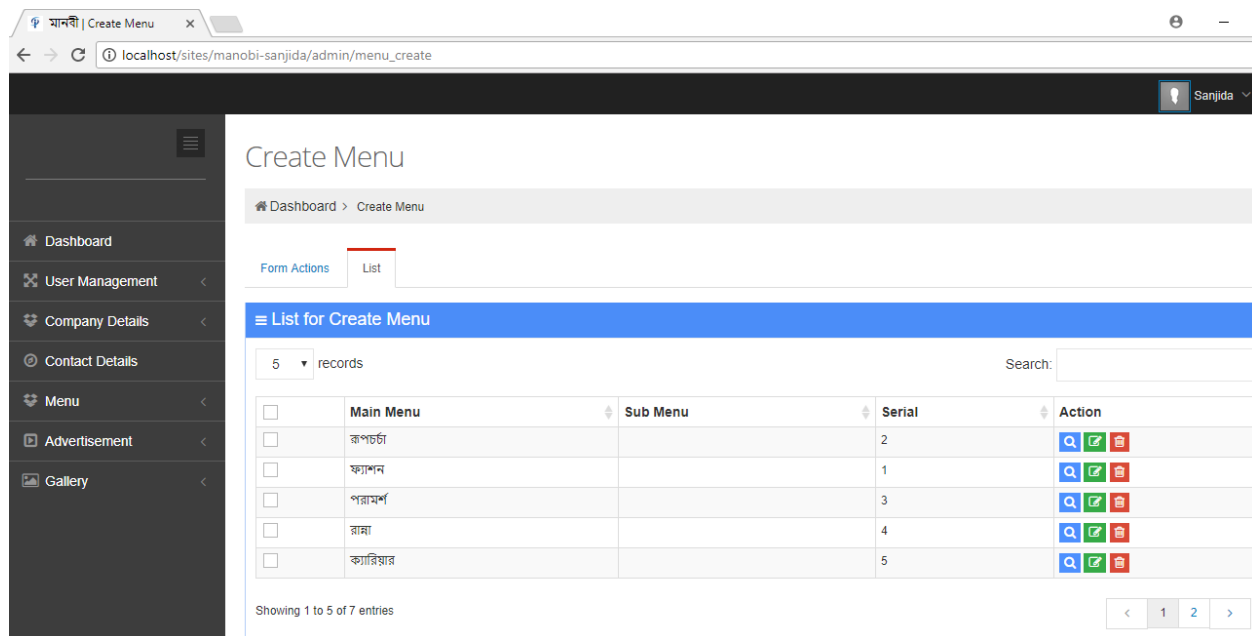

Contents Editable Section ,

Editable section contains various contents. The variety of the content is collected from the various part of the world's women's life style, it comes as a news that's why we can see the transient content in editable section. Generally it emphasis on lifestyle ,career , fashion , beauty tips and cooking as well but the contents of this section can be modified in anytime and additional menu can be added in anytime with the latest information about that context to enrich the E-ZINE.

Advertisement Section 'Women's online magazine system (E-ZINE)' the name of anything is the mirror to reflect about the activities of that things, likewise E-ZINE has got the meaning and objectives as well .the foremost objectives of E-ZINE is to create awareness about women's better life simultaneously it has got commercial objectives as well so that both side can be benefited from it. To focus on this objectives E-ZINE has added advertisement section. Each and every person wants to remain productive or want to be productive. E-ZINE has opens up that opportunity by adding this section with this magazine. This section motivates the user of this magazine to earn money from advertisement. It works in various way by using this section a user can boost her business. The way is very simple, this system main intercommunication system with the user of the magazine so that a user can contact with other user very easily, it helps to introduce the product of a business to the user of this magazine, this way it helps to create a big number of customer what helps to boost the business in a sort time, what businessman always expects. There are many women's in Bangladesh who has got many business idea but they are not being able to implement that skill due to not having the opportunity to introduce that in front of the customer. E-ZINE is not only published as a magazine but also it is coming in front of the woman with a proper business solution what will helps them to be self-help.
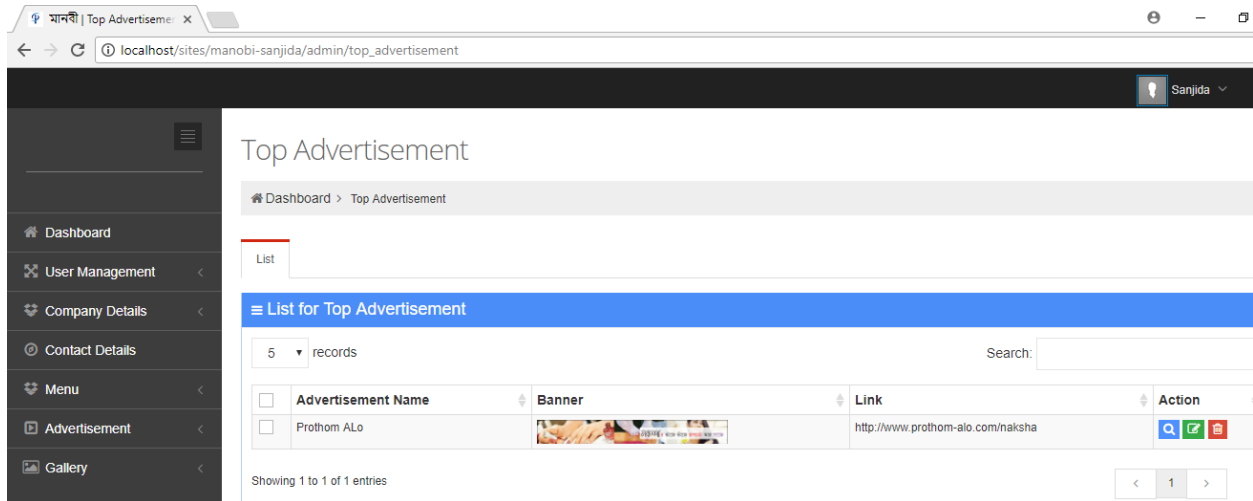

Entitle of Advertisement Section

Advertisement plays a vital role to introduce a commodity in the business world so that a consumer can get it from the outlet easily. A business has to maintain many parties interest. It is the common trend of any business. In terms of commercial point of E-ZINE advertisement section has introduced for both parties interest. It entitles its user to use this section for their own interest, by using this commercial section both party can be financially benefited.

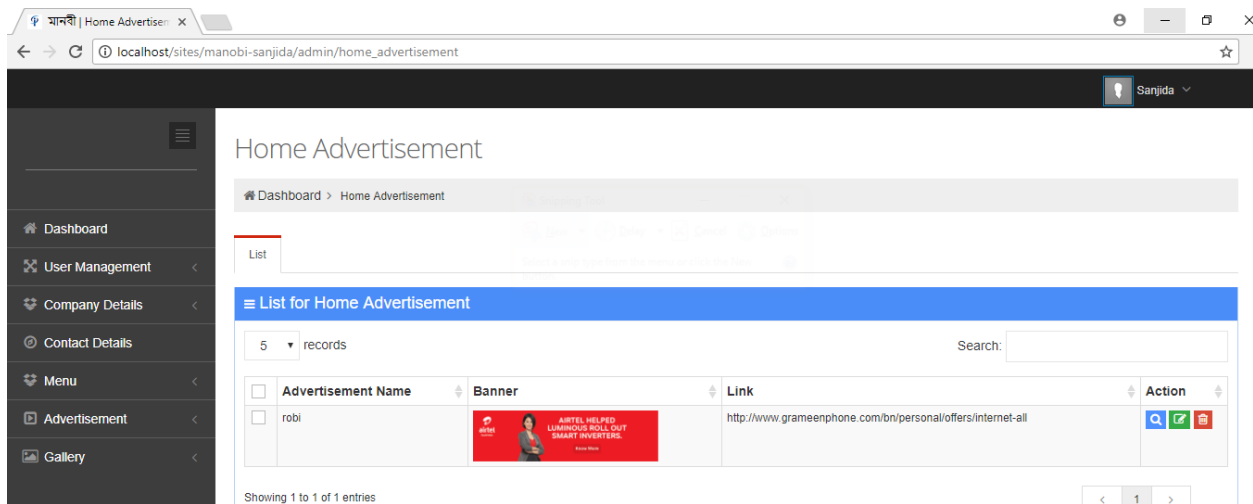

Position of Advertisement Section

Advertisement is always displayed in the right hand side of the page. Clear view of this section with colorful display easily attract its user. It can display with any context when a user go to read any topic of

the magazine. They can see the advertisement along with the main page's context. It is displayed without any hinder with topics. It increases the beauty of the page like an ornament. If anyone want to get access in the advertisement section to indulge the beauty of this site they can enjoy it easily. A simple click is enough to open the window of the advertisement section. This is the beauty of this section to enjoy the colorful display of advertisement.

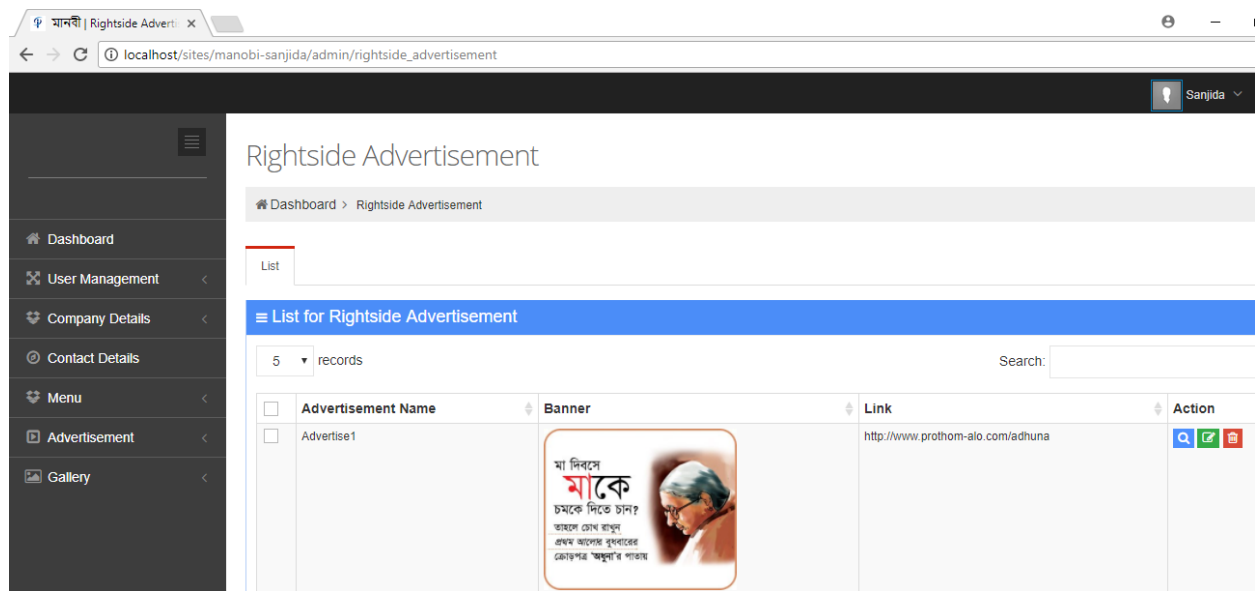

Gallery Section

Gallery display the colorful beauty of the magazine. It contains all sort of picture of the content in a folder, the folder is known as album. Album is divided into various files to locate the various types of picture. To see the picture of the gallery any user can open it by selecting the file of the album even if anyone want to add any picture it can be done by following the adding option of this section.
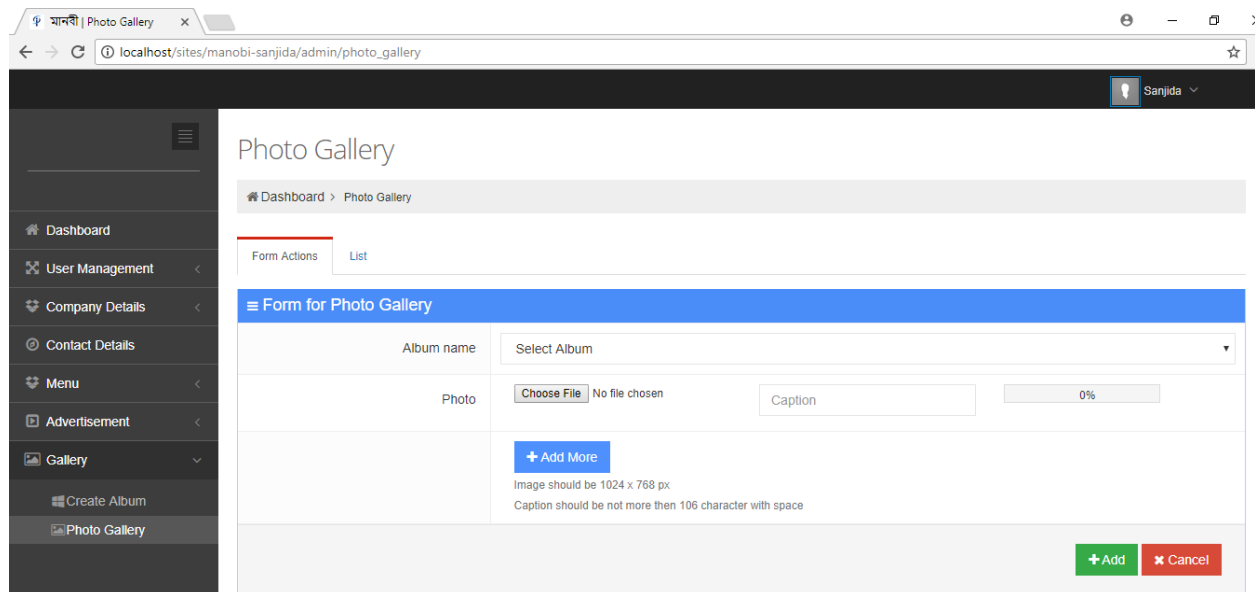

Main Website Content View

E-ZINE has got fabulous main website view with spectacular content. Eye soothing color of the feature of main website of E-ZINE with life changing content has created clear difference from the other ordinary electronic magazine. It is being possible due to apply well designed mechanism. In this window a user can see the umpteenth number of life changing events with elaborate explanation. The easy description of the events help to understand the objectives of the content. It contains colorful picture what makes the magazine lucrative to the women. Other feature of this page such as fashion, beauty tips, career, cooking and health tips are always published in the E-ZINE with the latest information. A user can enjoy this sort of feature at a glance with a finger tips from any part of the world.
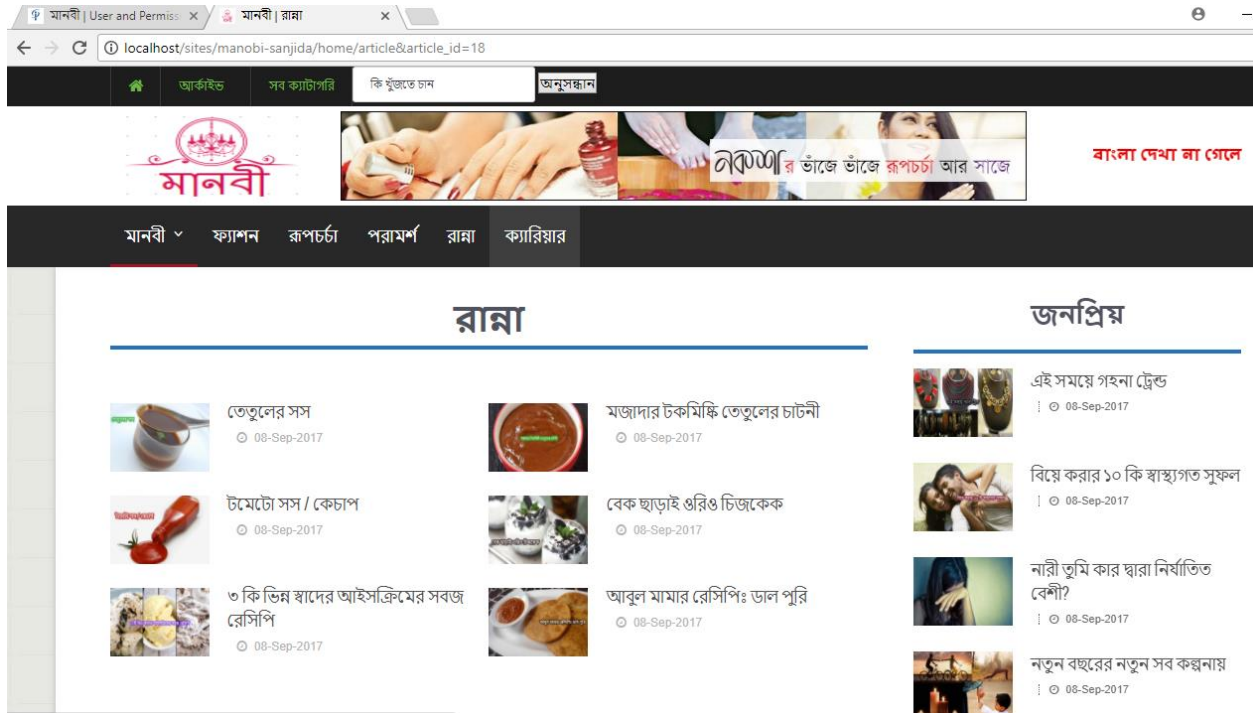

List Of Contents Heading Of Articles

Time is very important for every person. This page is the outcome of smart thinking to save the time for the user of the magazine. This page displays the list of the content from where a user can see all content at a glance. To select the desire content a user does not need to spend time just need to focus on the point to read the content.
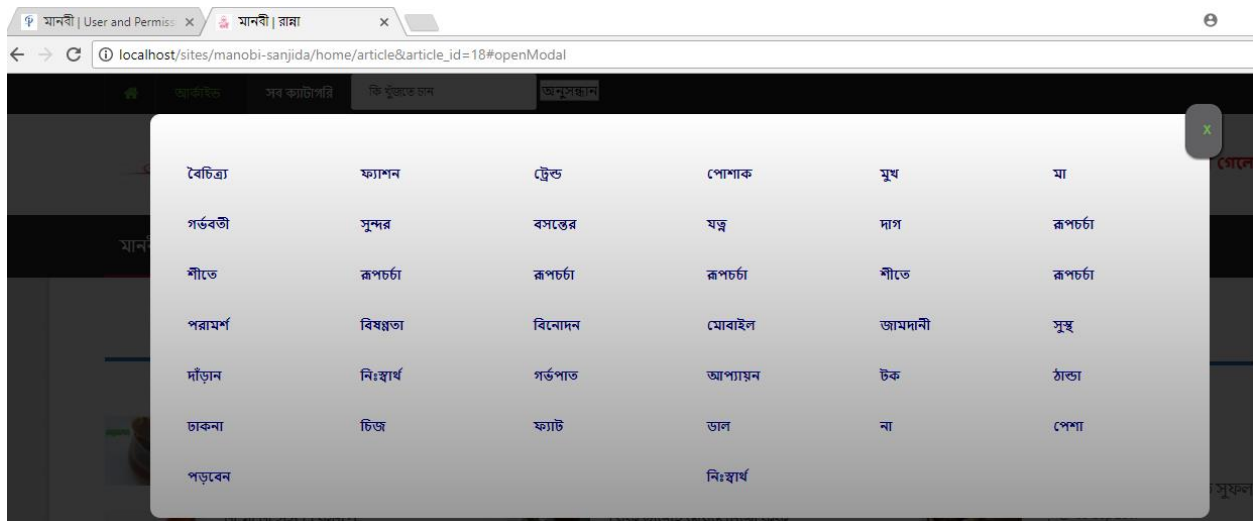

Tag Clouds For Contents

Tag clouds is huge store of information about the content. From where an user can get any information about any context.
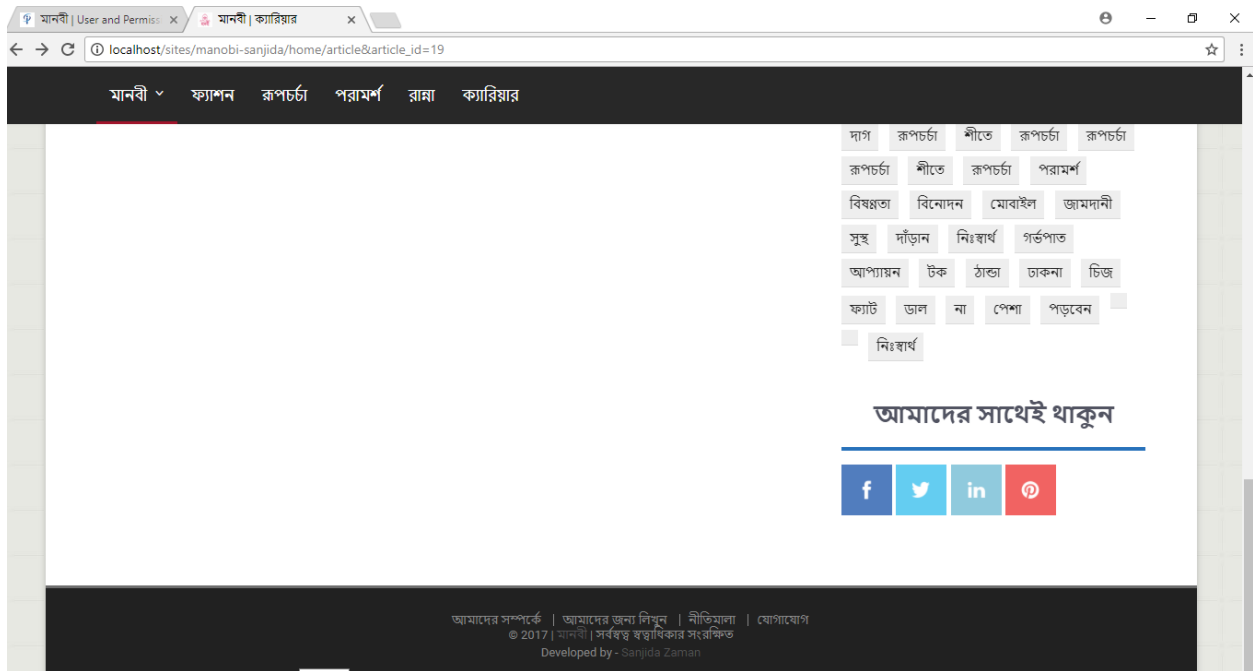

CHAPTER 7

CONCLUSION AND FUTURE WORK

7.1 Conclusion

E-ZINE is a wonderful creation in women's E-Magazine world. It is not only a magazine it is the pioneer of women's E-Magazine in which various techniques has applied to develop the system what will opens up the new era in women's E-Magazine world. To get easy access in this Magazine user friendly techniques has been applied which is faster, secure, and reliable to the user. Finally it has created that opportunity for the women what they were looking for to express their opinion not only these it will be published with various context what will help to meet the demand of their daily life.

To keep the system faster various technique has been applied which will help to update the system on time.

7.2 Future Work

Every creation has objective, likewise E-ZINE will come with various objectives in front of its beneficiaries. It won't published to meet the daily demands of the users only.

It contains commercial section as well by using this commercial section both party can be benefited from the earnings of the advertisement in future.
